Exhilarating driving at the push of e-Pedal

NISSAN INTELLIGENT MOBILITY

It's a completely new way to drive, and a whole lot of fun. Imagine having the option to drive with one pedal. With the flip of a switch, you can easily switch from two pedals to one. Just press down for instant acceleration and ease off to slow down. You can even hold the vehicle on a hill without ever touching the brake.

e-Pedal. Speed up, slow down and brake with just the accelerator pedal, making for a smoother drive.

Of course, e-Pedal is more than just a thrilling new way to drive. It also helps reduce fatigue, so you can enjoy every second behind the wheel.

So smart it can step in when you need it most

You may not even know why traffic suddenly slows down. But Intelligent Emergency Braking with Pedestrian Detection is keeping an eye out and is ready to apply the brakes. Of course, that's not the only way LEAF can step in to help keep you out of trouble.

Imagine driving with a suite of Nissan Intelligent Mobility features backing you up, including:

ProPILOT:
set your speed & then remain centered in the lane, ProPILOT maintains your speed and keeps your distance, it can even bring you to a complete stop.

Intelligent Cruise Control:
watches the flow of traffic to maintain your speed, but at the same time, responds to traffic changes around you to maintain your chosen distance from the car in front.

Intelligent Lane Intervention:
helps keep you where you want to be. It applies the brakes to help gently guide you back if it detects that you're unintentionally straying out of your lane for too long.

Intelligent Auto Headlights with full LED:
Your headlamps light your way by automatically turning on when it gets dark and then dip temporarily when an oncoming vehicle is detected.

Charging has never been so easy

With an innovative charging system, it's never been easier to get moving. And with a newly enhanced app that gives you access to your vehicle, getting a head start is just a tap away.
