ALL-NEW PEUGEOT 508 ALLURE
RESOLUTELY MODERN.

At the rear, the gloss black rear cluster connecting strip framed by the 3D effect of the lights⁽¹⁾, takes direct inspiration from the PEUGEOT Instinct concept car. The taut rear design is highlighted by the intricate rear wing design while the 18" 'Hirone' diamond-cut two tone alloy wheels⁽¹⁾ underline the dynamic silhouette of the all-new PEUGEOT 508 Allure.

FRAMELESS DOOR.

With its elegant, sleek and athletic body styling, the all-new PEUGEOT 508 Allure takes inspiration from the world of coupés but possesses all the features of a saloon. From the very first design sketches, the focus was on creating optimised proportions through meticulous attention to detail. The frameless doors, both front and rear are a true work of art, yet the thoughtful touches including thickened glass ensure all-new 508 provides both style and substance in equal measures.

OPEN TO THE WORLD.

Take in the beauty of the landscapes around you.

The panoramic opening glass roof⁽¹⁾ gives all passengers, including rear occupants, a unique wide-angle view of the landscape.

Official Fuel Consumption in MPG (l/100km) and CO₂ emissions (g/km) for the all-new PEUGEOT 508 range are: Combined 36.3 (7.8) – 59.8 (4.7) and CO₂ 132 - 99 g/km.

The fuel consumption you achieve, and CO₂ produced, in real world conditions will depend upon a number of factors: including the accessories fitted (post registration), variations in weather, driving styles and vehicle load. There is a new test (WLTP*) used to measure fuel consumption and CO₂ figures. The fuel consumption figures shown in this brochure are calculated under the WLTP test. The CO₂ figures shown are NEDC equivalent (NEDCeq), calculated using EC correlation tool which converts WLTP figures to NEDC figures, however, these NEDCeq figures are based on the outgoing test cycle (NEDC**) and will be used to calculate tax for first registration. Figures shown are for comparability purposes; you should only compare fuel consumption and CO₂ figures with other vehicles tested using the same technical standard.
