

SIMPLY CLEVER

ŠKODA

The New ŠKODA Yeti

24
WHEEL DRIVE

Effective: January 2014

Look out for these symbols as you read on. They will guide you through the 2 wheel drive features, 4x4 features, or features of both.

Welcome to the New Yeti

Yeti strikes the perfect balance between on road performance, style and family orientated practicality. Now, for the first time, you can choose between Yeti, with it's subtle and elegant looks, and Yeti Outdoor, which is robust, rugged and designed to excel off-road.

With a choice of two wheel drive (Yeti and Yeti Outdoor) or four wheel drive systems (Yeti Outdoor) on both diesel and petrol engines, as well as flexible Varioflex rear seating, sizeable boot space and higher ride height as standard, both Yeti and Yeti Outdoor are perfect for life in towns and cities.

But if driving off the beaten track appeals, at the mere push of the off-road button, Yeti Outdoor turns into a highly capable 4x4 off-road vehicle. It is adept at climbing slippery slopes, descending steep hills and maintaining control on difficult terrain using the very latest in 4x4 systems. Yeti Outdoor has all the benefits of a 4x4 vehicle combined with the practicality and drive of a family hatchback.

To help you navigate the way to your perfect Yeti, this brochure features 2 wheel drive Yeti and Yeti Outdoor from page 18 and 4x4 Yeti Outdoor from page 24 onward.

Read on to learn more about Yeti and Yeti Outdoor and their vast capabilities.

Design

The new Yeti is for the first time available in two distinct styles. Each has its own 'face', designed in the spirit of ŠKODA's new design language.

The Yeti looks sporty and sleek, with its bumpers, side sills and mouldings all in body colour. In contrast, the Yeti Outdoor is visibly more rugged and ready for off-roading; its strong presence a result of its newly designed front and rear bumpers and black body-styling.

The Yeti is defined by its combination of striking design and uncompromising functionality. Its bold and sophisticated new look, with sharp angles and clean lines, newly-designed headlights and the new ŠKODA logo, all hint at the Yeti's remarkable on and off-road capabilities.

The new ŠKODA Yeti is the perfect combination of stylish design and outstanding practicality.

Striking and dynamic

EXTERIOR

- BI-XENON HEADLIGHTS
- LED TECHNOLOGY
- PANORAMIC SUNROOF
- ROOF RAILS

Bi-xenon headlights with AFS. Bi-xenon headlights provide 2.5 times the illumination of standard halogen lights, and the optimal illumination is further enhanced by the adaptive front light system (AFS) which adapts the light settings based on the car's speed and the weather conditions. Standard on Elegance and Laurin & Klement.

LED daytime running lights. LED technology is more efficient when it comes to energy consumption and also provides higher durability. The LED strip elegantly complements the bi-xenon headlight design. Standard on Elegance and Laurin & Klement.

LED rear lights. The new rear light clusters, featuring two rear bands of light in the characteristic ŠKODA 'C' shape, can be enhanced with LED technology. Standard on Laurin & Klement.

Panoramic sunroof. Standard on Laurin & Klement and optional on SE and Elegance. The electrically-operated panoramic sunroof consists of two parts: the front section tilts to provide ventilation but also slides backwards over the rear section, providing fresh air, light and a feeling of vast space.

Roof rails. Both Yeti and Yeti Outdoor come with black roof rails as standard, but these can be upgraded to silver roof rails on Yeti and part-silver roof rails on Yeti Outdoor for a more stylish look.

Door mirrors. Electrically adjustable and heated door mirrors are standard and come in body colour on Yeti and in matt silver on Yeti Outdoor. Functionality is further enhanced as electrically folding door mirrors with boarding spots are standard on Elegance, and Laurin & Klement includes auto-dimming function in the driver's door mirror too.

INTERIOR

- HIGH QUALITY INTERIOR
- AIR CONDITIONING
- VARIOFLEX
- SIMPLY CLEVER FEATURES

High quality interior. The inside of the Yeti is just as striking as the outside, and can be further personalised with a choice of upholsteries, colours and inserts. Inside the new Yeti there's also a vast amount of space for both passengers and luggage. The Yeti has a generous 416 litres of usable boot space, which can be increased to a massive 1,760 litres when the Varioflex system is utilised and the rear seats are removed entirely.

3 spoke leather multi-function steering wheel. Standard across the range, the sporty 3 spoke leather multi-function steering wheel feels luxurious to the touch and also allows the driver complete control over radio and telephone functions.

Air conditioning. Manual air conditioning comes as standard on S, but on SE is upgraded to dual-zone air conditioning with humidity sensor and control, perfect for maintaining the optimum interior temperature at all times.

Simply Clever features and innovative storage solutions. As ŠKODA drivers have come to expect, Yeti is full of Simply Clever storage areas and designs to offer you solutions that fit your life.

Uncompromising comfort

24
WHEEL DRIVE

Varioflex. The Varioflex system provides Yeti with an extremely flexible and functional array of seat positions. There are over 20 different seating combinations, the main functions are as follows:

- Outer seats can slide forwards and backwards
- All seats can be folded down individually
- Outer seats can recline by 13.5°
- All seats can be rolled up (and stowed against front seats)
- Middle seat can fold to create an additional armrest with integrated cup holder*
- Middle seat can be removed and outer seats slid towards centre, creating a two seater in the rear

*Standard on SE, Elegance and Laurin & Klement.

Please note there are some key differences between the Yeti and Roomster Varioflex seats: the middle seat on Yeti is 35mm longer than that of Roomster, and when the centre seat is removed, the outer seats slide 80mm towards the centre on Yeti (Roomster slides 110mm)

TECHNOLOGY

- REAR-VIEW PARKING CAMERA
- DIRECT SHIFT GEARBOX (DSG)
- KESSY
- NAVIGATION SYSTEMS
- RADIO & SOUND SYSTEMS
- PARK ASSIST

Modern **technologies** not only make travelling more pleasant but increase the ease of handling the vehicle.

The **Columbus navigation system with DAB** is standard on Laurin & Klement and available as an option on SE and Elegance. It features a 6.5" colour display with touch-screen, voice control function and includes a 30GB hard drive, 20GB of which can be used to store music. Up to 10 navigation routes can be stored in its memory, and the map data contains points of interest, information about which can be displayed if selected by the driver.

Direct Shift Gearbox (DSG), available in both 6-speed and 7-speed versions, guarantees smooth and rapid gear shifts resulting in maximum utilisation of the potential of the engine's torque.

The **recommended gear shift** function is displayed in the top right corner of Maxi DOT.

In vehicles equipped with the optional **KESSY** (Keyless Entry, Start and exit system) the driver can lock and unlock the car as well as start and stop the engine without having to insert or even handle the car key.

The **Bolero radio** which is standard from SE has multitude of functions, such as a reader for SD or MMC data cards, the ability to play CDs as well as files in MP3 and WMA formats and memory for radio traffic reports (TIM).

For the first time on ŠKODA range, a **rear-view parking camera** is available as an option on the new Yeti. The camera is positioned on the tailgate handle and provides a visual of what is behind the car, in order to make any parking manoeuvre effortless.

Park assist is standard on Laurin & Klement and optional on SE and Elegance. Parallel parking and bay parking in the Yeti is now easier than ever thanks to a the latest generation of ŠKODA's award winning Park assist.

With a press of a button, the system will begin searching for a parking space in a line of cars or obstacles. When a suitable space is found (the car's length + 60 cm is all the space needed), the car will steer itself into the space whilst the driver controls the pedals. The system will now also steer the car out of a line of cars from its parking space and with two presses of the same button, the car will search for and manoeuvre into a bay parking space.

The optional **12 speaker 'Soundsystem'** with a digital equaliser and 12 speakers provides excellent sound reproduction for an enhanced acoustic experience.

Maxi-DOT comes as standard across the Yeti range. Maxi-DOT, with its larger display, details fuel consumption, average speed and distance until the fuel tank is empty, and also has the ability to display phone, audio and navigation data too.

24 WHEEL DRIVE Advanced infotainment

Smart protection

SAFETY

- AIRBAGS
- DRIVER FATIGUE SENSOR
- TYRE PRESSURE MONITOR
- ESC
- ISOFIX
- HILL-HOLD CONTROL

Yeti features **7 airbags as standard**, located at the front, front side, curtain and driver's knee area. For additional protection rear side airbags can also be specified.

Driver fatigue sensor, available as an option across the Yeti range, monitors the movement of the driver through the steering wheel and if it detects signs of tiredness, audibly alerts the driver and shows a break recommendation alert on the Max-DOT display.

The two outer rear seats in all Yeti models feature **ISOFIX** as standard. The ISOFIX brackets create a fixed link between a child seat and the car's chassis, which is important for ensuring the seat is effectively secured in the event of a collision. ISOFIX can be specified on the front passenger seat too.

The optional **tyre pressure monitor** will highlight any loss in pressure of the tyres to the driver immediately, as a decrease in pressure could radically change the car's behaviour and drivability, potentially causing an accident.

ESC (Electronic Stability Control) is standard and delivers a number of systems designed to help maintain the car's stability in braking and emergency situations. See the technical glossary for further details.

Hill-hold control applies pressure on the braking system for a further 1 or 2 seconds after the driver releases the brake pedal (when the hill gradient is more than 5%). This allows the driver enough time to move away without rolling. Hill-hold control is standard on Elegance and Laurin & Klement and optional on S and SE.

ŠKODA GreenLine II Technology

ŠKODA Green Future forms an integral part of our corporate philosophy. This is reflected in our efforts to keep reducing fuel consumption and consequently CO₂ emissions and no more so than as displayed by our GreenLine models.

The **Yeti GreenLine II** has a lower chassis as well as other modifications to enhance efficiency. Powered by the **1.6 TDI CR 105PS DPF** it achieves a combined consumption of 61.4 mpg and a CO₂ emission level of **119 g/km**.

A **GreenLine badge** can be found on the front grille.

Low rolling resistance tyres. Yeti GreenLine II has 16" Dolomite alloys, whilst Yeti Outdoor GreenLine II comes with 16" Nevis alloys as standard. These lighter alloy wheels with low rolling resistance tyres have a higher prescribed air pressure to reduce friction.

The Start-Stop system automatically switches off the engine, for example while waiting at the traffic lights. By pressing the clutch pedal the engine automatically restarts.

Energy recovery functionality, further assists this by enabling effective use of the car's kinetic energy for battery recharging.

Yeti and Yeti Outdoor, at home in the city

After a 4x4 Yeti? Turn to page 24

On-road

Yeti is perfectly designed for life on the city streets. It combines the practicality of a hatchback with fantastic visibility and amazing flexibility, making it a great family car.

Yeti's higher ride height and rugged design with seven airbags as standard is ideal for the school run. There's lots of boot space too so you can load up your shopping, sports kit, gardening equipment, the dog and pushchairs!

Flexible Varioflex seating ensures all passengers can get comfortable with over 20 different combinations. Seats can be moved forwards and backwards, reclined, rolled up individually or completely removed.

Park assist* helps reduce the stress of parking on busy streets. Press the park assist button, take your hands off the steering wheel and whilst you control the speed, Yeti will manoeuvre itself into the parking space.

Yeti can also be an extension of your office. With Bluetooth® and multi-function steering wheel as standard, and cruise control and leather seats also available, Yeti is a great choice as a business partner.

There is also a GreenLine II engine in the Yeti range, available on S, SE and Elegance. GreenLine II technology delivers CO₂ emissions of just 119g/km, and excellent fuel consumption. This means less impact on the environment and your pocket.

*Standard on Laurin & Klement. Optional on SE and Elegance.

4x4 Yeti Outdoor, at home on the trail

After a 2 wheel drive Yeti? Turn to page 18.

Off-road

For those needing a sturdy and versatile car that can handle outdoor living with ease, the 4x4 Yeti Outdoor is for you. With one of the latest 4x4 systems and some very clever technology, Yeti Outdoor handles most off road situations, slippery roads or rough ground.

Off-road button*. By pushing the off road button, Yeti Outdoor helps maintain control when the driving conditions get tough. It will maintain a constant speed downhill on a steep slope (over 8%), maintain traction going uphill and stop over revving of the engine, hold the car still on a hill start and help prevent the wheels from spinning on loose surfaces or wet, slippery roads.

4x4 system. The latest generation 4x4 system helps you maintain control and stability at all times. The system senses what is happening on each wheel and quickly transfers power or automatically applies brakes when needed to give more grip or drive to keep you on your chosen path.

Rough road package. The optional rough road package comprises of:-

- > A thermoplastic cover for the engine and transmission
- > A plastic cover for the fuel and brake lines
- > Reinforced brake fluid distribution system and hand-brake cable

The vehicles ground clearance is not affected by the installation of this package and remains at 180mm.

* Standard on Elegance and Laurin & Klement 4x4. Optional on S and SE 4x4.

The off-road button* has a set of intelligent functions to aid driving on difficult, slippery surfaces, further increasing the safety of driver and passengers. The system is enabled when the button is pressed and illuminates. The driver does not need any previous off-road experience to feel the benefits of this easy to use system.

Uphill start assist.

- > Used to assist in pulling away on wet, slippery or snowy road surfaces
- > Allows the accelerator to be fully pressed but with the RPM restricted to 2,500
- > Helps prevent damage to the clutch and engine
- > Allows driver to maintain control

Downhill assist.

- > Maintains a stable speed during descent down slippery, wet or snowy road surfaces
- > Engine is running, but is engaged in neutral, first, second, third or reverse gear
- > ESC brakes the wheels individually, preventing locking
- > In neutral the driver does not have to press accelerator or brake pedal
- > Allows the driver to concentrate fully on steering the car

ABS off-road.

- > Improves braking effect of the car
- > Longer braking creates a 'chock' of surface material, enhancing vehicle control
- > Only active up to 30mph

ASR off-road.

- > Improves acceleration on slippery surfaces
- > ASR is set to manage a higher slippage on the driving wheels
- > Helps maintain driver control and vehicle stability

EDS off-road.

- > Maintains permanent traction of the car
- > Can work diagonally across axles
- > Brakes the slipping wheel(s)
- > Helps maintain driver control and vehicle stability

Because of errors which may occur in the print, the colours illustrated here may differ from the actual finishes themselves. Your ŠKODA retailer will be pleased to advise you.

The ŠKODA Yeti colour roof options

You can now select a black, white or silver roof for your Yeti or Yeti Outdoor, adding another level of personalisation to your car. Also, if you choose a black roof on the Yeti, you can opt to match your mirrors to your roof too. Coloured roofs are available on S, SE and Elegance. See page 30 for prices.

Please note: The following colour combinations are not available:
Black roof with Pacific Blue, Magnetic Brown metallic or Black Magic pearl effect.
White roof with Candy White, Moon White metallic, Brilliant Silver metallic or Magnetic Brown metallic.
Silver roof with Candy White, Moon White metallic, Brilliant Silver metallic or Magnetic Brown metallic.

2.0 TDI CR 170PS 4x4	0.361

CR = Common rail .

Official fuel consumption for the Yeti range in mpg (litres/100km):

urban	28.8 (9.8)	-	54.3 (5.2);
extra urban	42.8 (6.6)	-	67.3 (4.2);
combined	36.2 (7.8)	-	61.4 (4.6).

CO₂ Range 184 - 119g/km

*Lower efficiency when using lower RON petrol.

We measure the maximum power output figures of our engines in PS or Pferdestärke (horse strength in German), which is the metric equivalent of bhp. To convert from metric to imperial horsepower, divide the PS figure by 1.0139.

* Fuel consumption and CO₂ figures are obtained under standardised EU test conditions (Directive 93/116/EEC). This allows a direct comparison between different manufacturer models but may not represent the actual fuel consumption achieved in 'real world' driving conditions. More information is available on the ŠKODA website at skoda.co.uk and vca.gov.org.

VED (Vehicle Excise Duty)

ŠKODA Solutions. Your journey, your choice.

ŠKODA Finance like to do things a little differently, that's why for many years we've specialised in providing simple and convenient funding options for ŠKODA drivers. It's what we know.

ŠKODA Solutions is all about you; a flexible, competitive fixed-rate plan designed around you and your budget, putting you firmly in the Yeti driving seat.

Solutions is different because you defer a proportion of the car's value until the end of the agreement, giving you significantly lower monthly repayments than if you'd taken out a loan...ever heard of a bank being so imaginative?

Solutions is totally flexible. You get to choose the size of your deposit (from as little as one monthly payment), and a repayment period which suits you and at the end of the term you have 3 options to choose from.

- 1  Part-exchange the car for a new ŠKODA on a new Solutions contract.
- 2  Pay the optional final payment so that you own the car.*
- 3  Circumstances changed? Return the car to us (subject to terms and conditions).

 **DEPOSIT**

As little as one repayment

 **BALANCE**

A flexible repayment period
(18-42 months)

   **OPTIONAL FINAL PAYMENT**

3 choices at the end of the agreement

ŠKODA Finance also offers hire purchase, contract hire and service and maintenance plans.

Speak to your ŠKODA retailer for your personalised quotation today

Free Insurance for 3 years...

Another great benefit of being a ŠKODA driver. If your ŠKODA was damaged in an accident, wouldn't you want it fixed by a ŠKODA trained technician using only genuine ŠKODA parts?

Insurance is ŠKODA's accident and repair cover which does exactly that. It works alongside your main comprehensive motor insurance policy no matter who you are insured with, to make sure you get the quality repair and service you would want. If you're involved in an accident or your car is stolen, just one call to us and we'll look after your claim from start to finish ensuring your ŠKODA is restored to the highest standard.

Get Insurance and benefit from:

- > A guarantee that your ŠKODA will be repaired in a ŠKODA Insurance approved repairer, by ŠKODA trained technicians, using only genuine ŠKODA parts and paints
- > A dedicated Claims Manager available 24-hours a day to manage your claim, liaising with your insurer and the repairer, so you don't have to
- > Help to recover any uninsured losses using our Legal Expenses Cover
- > Online claims tracking so you can keep up to date with the status of any claim

Insurance is free to all ŠKODA customers for three years and it only takes a minute to get cover.

You only need to make one call, Insurance deals with the rest...

Your car is **guaranteed** to be repaired by a ŠKODA Insurance approved repairer. Only **genuine ŠKODA parts will be used.**

For more information and to take out cover today visit skoda-ensurance.co.uk

ŠKODA Insurance motor insurance is sold, underwritten and administered by Allianz Insurance plc.

*Subject to payment of the option to purchase fee. An offer of finance depends on certain conditions. Subject to status, indemnities may be required. Available to over 18's in the UK only. ŠKODA Finance. ŠKODA Finance is a trading name of Volkswagen Financial Services (UK) Limited, Brunswick Court, Yeomans Drive, Blakelands, Milton Keynes MK14 5LR. Registered in England number 2835230.

Owning a ŠKODA

We make sure it's easy, fun, and stress-free.

ŠKODA customer service is officially award-winning. We have been voted Number 1 in the 2012 Driver Power survey for the fourth year running.

Network capability

You can enjoy our award-winning customer service through our network of around 165 Authorised Repairers.

As a ŠKODA customer, you will be looked after by your retailer from the moment you walk through the door and throughout the life of your ŠKODA. Your Yeti will be serviced and maintained to the highest standards by specially trained ŠKODA technicians. And when you need a spare part, you'll be happy to know that most are held in stock, or can be ordered within 24 hours.

The ŠKODA Customer Promise is a commitment from our retailers to offer:

- > Care and consideration for you and your car
- > A flexible and convenient service
- > Expertise and attention to detail
- > A clear explanation of our work

Roadside Assistance

A three year, European-wide, unlimited mileage ŠKODA Assistance policy comes free of charge with every new ŠKODA.

There's a team of specially trained Technicians who carry the right diagnostic equipment and parts to get you back on the road as quickly as possible in the unfortunate event of a breakdown. They'll even help you if you fill up with the wrong fuel, lose your car keys, or get a puncture.

Warranty

When you buy your new ŠKODA through our authorised retailer network, it is automatically covered by a three year, 60,000 mile manufacturer's warranty.

There's no mileage limit on the warranty in the first two years and for additional peace of mind there's a 12 year body protection warranty.

You can even extend your warranty to four or five years, see the option page for prices and page 32 for further details.

Warranty cover from new			
First 2 years	First 3 years	4-5 years	Up to 12 years
Unlimited mileage	3 years or 60,000 miles, whichever is sooner	Optional Extended Warranty	Body Protection Warranty

Further information

You can find lots of additional information about owning a ŠKODA on our website at skoda.co.uk. Our retailers are always happy to help with any questions, backed up our dedicated Customer Service Centre. We look forward to hearing from you soon.

Technical glossary

ABS: the anti-lock braking system prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable. When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the system reduces brake pressure to that wheel.

Elements of the ABS System :-

• **Dual Rate Vacuum Brake Boosters**: increases brake effort under emergency braking conditions.

• **EBC**: Electronic brake control. The engine brake torque control regulates the power supply by intervening with the engine management system.

• **EBD** (aka EBV): Electronic Brake Distribution automatically distributes different pressures to the front and rear brakes to stop the rear wheels from locking up under heavy braking. It also compensates for loaded and unloaded vehicles therefore doing away with the need for a Load Sensing Valve on the rear axle.

• **MBA** Mechanical brake assist uses a mechanical device inside the brake servo. If the brake pedal is pressed rapidly , it activates the mechanical device to give maximum braking pressure to the wheels, even if the driver is not pressing the brake pedal particularly hard.

CAN Bus: the CAN Bus is an electronic data bus which links the various different electronic control systems in the car. It ensures ideal co-ordination between systems and reduces the amount of wiring needed in the car.

Fuel cut-out: should one or more of the airbags inflate after an accident, this system automatically cuts out the fuel supply, thus preventing subsequent leakage of the diesel or petrol.

Trip Computer: the trip computer not only features an impressive range of data displays, operating it is simplicity itself. A multifunction touch key enables you to call up all relevant data on the easy-to-read display. Features include external temperature, time, current fuel consumption, average fuel consumption, miles driven and average speed.

CR: the completely new range of diesel engines are built on a system of Common-Rail fuel injection. The diesel engines have a high-pressure common rail direct injection fuel system and four-valve technology. As a result, the new engines are much quieter, more refined in their operation and consume less fuel, compared to the Pump Duse engines and significantly reduce emissions.

DPF: diesel particulate filter is part of the exhaust system responsible for cleaning the engine exhaust gases before they enter the atmosphere. The DPF catches soot particles emitted in the exhaust gas and it works in conjunction with the catalytic converter, which reduces the amount of harmful gases entering the atmosphere. The DPF must periodically be emptied of the soot particles, a process known as regeneration. This involves elevated exhaust system temperatures. A driving style is required during regeneration, where a constant vehicle speed above 37 mph must be maintained. This does not always suit customers who make frequent short journeys or experience stop/start driving or drive within inner-city or urban areas.

ESC: Electronic Stability Control is designed to stabilise the dynamic handling response of the vehicle by counteracting any tendency towards oversteer or understeer. The ESC constantly compares the actual movement of the vehicle with predetermined values and according to the situation ESC reacts by braking each wheel individually (according to direction of slip) and automatically adjusting the engine’s output.

Elements of ESC system:-

• **ASR**: anti-slip regulation traction control ensures the Yeti’s stability when pulling away or accelerating. If the engine power or torque being transmitted to the drive wheels is too great, for example on a slippery road surface, engine torque is automatically reduced until optimum road holding returns, thus preventing wheelspin. A light indicates whether the ASR system is on. It can be manually switched off.

• **MSR**: the engine torque control system recognises when the wheels are subject to too much slippage and regulates the power supply by intervening in the engine management system. This prevents wheelspin when, for example, changing down on a smooth or wet road surface. MSR is a constituent part of the ASR system.

• **EDS**: the electronic differential lock continually compares the rpm of the drive wheels, and if it identifies a difference between them which could lead to an individual wheel spinning, for example if the two wheels are on different types of surface or accelerating on wet leaves, the system brakes the wheel affected until uniform rpm of all drive wheels is restored.

• **HBA**: Hydraulic brake assistant increases the optimal build-up of brake power. It ensures complete use of the brake system potential, thus shortening the braking distance.

• **DSR**: Driver Steering Recommendation – in a crisis situation it helps the driver stabilize a skid by making a slight intervention in the steering.

• **ESBS**: Electronic Stability Brake System – targeted interventions in the braking process improve the handling of a car as it brakes when passing round a bend and keeps it from veering.

AFM: records and assesses all available data about the journey to optimize the ESC system’s reactions, which can thus be adapted to any driving style and the current vehicle payload.

HHC: Hill hold control allows for a safe hill start by holding the brake for a small amount of time, reducing the risk of unintentional reversing or roll back.

TPM: Draws the driver’s attention to any pressure loss in any of the tyres. Early warning can prevent damage from occurring as a result of an under inflated tyre or a defect that radically changes the cars behaviour and driveability.

Xenon lights: the Xenon lights produce about 2.5 times the light of standard Halogen lights with 35% less energy consumption.

Extended warranty

Exclusions and limitations

Wear and tear components will only be considered under the terms of the warranty for the first of six months or 6,500 miles, whichever is soonest. These include, but are not limited to brake linings and disc pads, clutch release bearings, clutch pressure plates and centre plates, tyres, wiper blades, seat and backrest covers, floor coverings, spark plugs, batteries for key fobs and alarms, light bulbs and shock absorbers.

Mechanical adjustments including but not limited to adjustments to doors, flaps, boot lids, bonnets and sunroof, brake adjustment, clutch adjustment, v belt adjustment, ignition adjustment, headlight adjustment, steering geometry adjustments and wheel balancing are excluded.

Damage (including but not limited to the following) is excluded:

➤ Damage caused by your failure to take all reasonable steps to prevent mechanical damage from occurring.
➤ Damage or defects caused by not having the vehicle serviced in accordance with the manufacturer’s guidelines.
➤ Damage or defects caused by improper use of the vehicle, neglect or use of the vehicle for motor sports activities.
➤ Damage caused by an accident.
➤ Damage to paintwork or chrome caused by external influences, such as climatic, chemical or industrial pollution.
➤ Damage resulting from the use of non-original replacement parts.

Routine maintenance and servicing is not covered by the warranty. Incidental or consequential costs such as hotel charges, car hire, loss of personal effects or income are not recoverable under the terms of the warranty.

Service Intervals

When you order your Yeti, you can choose whether your car is on a fixed or a flexible service regime. Your retailer will help you decide which regime suits how your car will be driven, enabling your car to stay in the best possible shape.

Fixed regime: Service every 10,000 miles or one year (whichever comes first). This is recommended if the vehicle is likely to be used in the following way:

➤ Driven fewer than 10,000 miles per annum **and/or**
➤ Mainly short journeys, drive mostly in towns or cities **and/or**
➤ High vehicle loading/towing and frequent hill climbs **and/or**
➤ Heavy accelerating and braking, using high revs

Flexible regime: Sensors in the engine detect when a service is needed. You will be informed of this by a service light which will show at any point between 9,000 and 20,000 miles, up to 24 months (whichever comes first).

The flexible service regime is recommended for vehicles with a daily mileage of more than 25 miles where the vehicle is driven regularly and mainly at a constant speed with minimum vehicle and engine loading, minimal towing and driven in an economical manner.

Motability

People in receipt of the Higher Mobility Component of the Disability Living Allowance receive special help from ŠKODA. Preferential prices on low cost Contract Hire are available through your local approved Motability retailer. For full details, contact your retailer.

Calculating your tax liability

To find out how much tax you will pay, simply take the P11D value, then multiply this figure by the BiK percentage. Then simply multiply this figure by 20% or 40% depending on the level of income tax that you pay.

Please note if your employer provides you with free fuel, this is treated as an additional taxable benefit.

For more information on company car taxation please visit the HM revenue and customs website hmrc.gov.uk

BiK calculation example- Yeti S GreenLine II 1.6 TDI CR 105PS DPF	
P11D value	£18,040.00
Company Car BiK tax based on CO2 emission level	18%
Taxable BiK (for 2013/2014 tax year): 18% of £18,040.00	£3,247.20
Annual company car tax (2013/14)	
20% Income Tax: 20% of £3,247.20	£649.44
40% income Tax: 40% of £3,247.20	£1,298.88
Monthly company car tax (2013/14)	
20% Income Tax: £649.44 divided by 12 months	£54.12
40% income Tax: £1,298.88 divided by 12 months	£108.24

Band	CO2 (g/km)	First 12 Months¹	Standard VED ²	OTR (Recommended On The Road) * Recommended 'On the Road' prices include delivery, 12 months Road Fund Licence, DVLA First registration Fee (at £55), and apply to the United Kingdom only.
A	Up to 100	£0	£0	
B	101 - 110	£0	£20	
C	111 - 120	£0	£30	
D	121 - 130	£0	£105	
E	131 - 140	£125	£125	
F	141 - 150	£140	£140	
G	151 - 165	£175	£175	
H	166 - 175	£285	£200	
I	176 - 185	£335	£220	
J	186 - 200	£475	£260	
K	201 - 225	£620	£280	
L	226 - 255	£840	£475	
M	Over 255	£1,065	£490	

¹First year vehicle licence rates for petrol and diesel cars purchased on or after 1st April 2013. First year rate or 'showroom tax' applies to new car purchases only.
²Rate reverts to the Government's applicable Standard VED rate in subsequent years.

Edition: UK 1st April 2013. VAT is calculated at 20%.

VED (Vehicle Excise Duty)
****** All vehicles will be subject to Vehicle Excise Duty based on the fuel type of the vehicle and its carbon dioxide (CO2) emissions level, measured in grams per kilometre (g/km). Due to changes in vehicle emissions data, CO2 figures may differ on these vehicles if taken from current ŠKODA UK stock. The VED bands are shown in the table opposite.

Company car tax is based on your cars carbon dioxide emissions. The higher the car's emissions, the higher its tax liability. When a company car is made available for private use a 'Benefit in Kind' value is calculated for tax purposes.

To help you work out your tax liability please refer to page 50.

P11D (Expenses and Benefits)
The P11D value is calculated by taking the On The Road (OTR) price for the vehicle, less the Road Fund Licence (RFL) and First Registration Fee (FRF).

BiK (Benefit in Kind)
The BiK percentage value is based on the CO2 emissions of the vehicle for the current tax year 2013/2014.
