

KORANDO

SSANGYONG

Styled by legendary car designer Giorgetto Giugiaro and recently updated, Korando is a true blend of Italian form and Korean function. The front end styling features a new grille and modern projector headlamps with LED daytime running lights to give a sharp contemporary look. This theme is followed throughout with new wheel designs, new rear light clusters and new colours – but the simple elegance of Giugiaro's original design is maintained throughout.

Korando is also noted for its generous levels of standard equipment and its 5 year limitless mileage warranty. Now Korando packs even greater value with alloy wheels, cruise control, puddle lamps (on the heated door mirrors), lower windscreen de-icer, remote central locking and a host of other features standard across the range.

STYLE & DESIGN

Korando now has a completely new interior that is both modern in its design and driver-friendly in its function. The dashboard features soft touch materials and an integrated passenger airbag. There is an abundance of storage space including two cup holders, a mobile phone tray and sunglasses holder.

Korando's height gives a commanding view with leather seats heated front and rear,* that smoothly adjust to fit you. There's also air conditioning, a high quality six speaker audio with Bluetooth MP3/iPod connectivity and steering wheel controls, front, side and curtain airbags and cruise control.

*Leather upholstery with front and rear seat warmers standard on ELX4 models

Korando's Torque on Demand 4x4 talks to itself, thinks and acts many times a second. A network of sensors maintain a stream of reports to the system's central processor, which makes lightning decisions about power and braking. The result: you're always serenely in control.

4X4 & ELECTRONICS

TORQUE ON DEMAND 4X4 SYSTEM

Korando EX features an advanced 4x4 system that operates in two modes, depending on conditions and settings.

AUTO MODE

In auto mode and in normal conditions, Korando remains in two wheel drive to optimise fuel efficiency. When sensors detect a potential loss of grip, the system switches to four wheel drive mode.

LOCK MODE

For very loose or slippery surfaces, the 4x4 system can be locked to allocate drive equally between front and rear wheels. This provides supreme grip and control for low-speed manoeuvres.

HILL START ASSIST

A great ally when towing, this system acts like an automatic handbrake to prevent rolling backwards during a hill start.

ABS WITH ELECTRONIC BRAKEFORCE DISTRIBUTION (EBD) ELECTRONIC STABILITY PROGRAMME (ESP) WITH ACTIVE ROLLOVER PROTECTION (ARP)

All Korando models benefit from these systems, which employ a variety of sensors to detect imminent loss of control or rollover, and uses electronic control of the vehicle systems to maintain stability and traction.

16" WHEEL
(SE & SE4)

17" WHEEL
(ELX & ELX4)

Korando's new e-XDi diesel engine is clean, efficient and powerful. Mated to a 6 speed manual transmission it develops 149PS between 3400-4000rpm, whilst the 6 speed automatic is fitted with the high output 175PS version. Both develop 360Nm of torque between 1500 and 2800rpm giving a wide spread of power – enough whether towing, off-roading or performing normal family duties.

In towing, numbers certainly tell the true story – Korando's sturdy construction and strong engine performance give a 2 tonne towing capacity across the range.

And Korando is rapidly becoming a favourite of caravan towers, a fact recently recognised by Korando SE's win in the under £16,000 category of the 2014 Caravan Club towcar of the year awards.

* At maximum towing weight the trailer must have remote braking capability.
** A guide to fuel economy and CO2 emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO2 emissions. CO2 is the main greenhouse gas responsible for global warming.
