

korando

SSANGYONG

STYLE & PERFORMANCE

Styled by legendary car designer Giorgetto Giugiaro, Korando is a true blend of Italian form and Korean function. The front end styling features a modern grille and projector headlamps with LED daytime running lights to give a sharp contemporary look. This theme is followed throughout with new wheel designs, new rear light clusters and new colours – but the simple elegance of Giugiaro's original design is maintained throughout.

The introduction of a new 2.2 litre diesel engine has taken Korando's performance to new levels. With 400Nm of torque from just 1400 rpm, the new engine gives great driving flexibility which further improves Korando's noted towing abilities. And with improved fuel economy and reduced emissions Korando 2.2 litre adds efficiency to strong performance.

Korando is also noted for its generous levels of standard equipment and its 5 year limitless mileage warranty. Now Korando packs even greater value with alloy wheels, cruise control, puddle lamps (on the heated door mirrors), lower windscreen de-icer, remote central locking, roof rails, front fog lights, a rear parcel shelf and a host of other features standard across the range.

ELEGANT & PRACTICAL

Korando has a contemporary interior that is both modern in its design and driver-friendly in its function. The dashboard features soft touch materials and an integrated passenger airbag and ELX models feature comfortable leather seats that are heated front and rear. There's also air conditioning and front and side curtain airbags to ensure your safety.

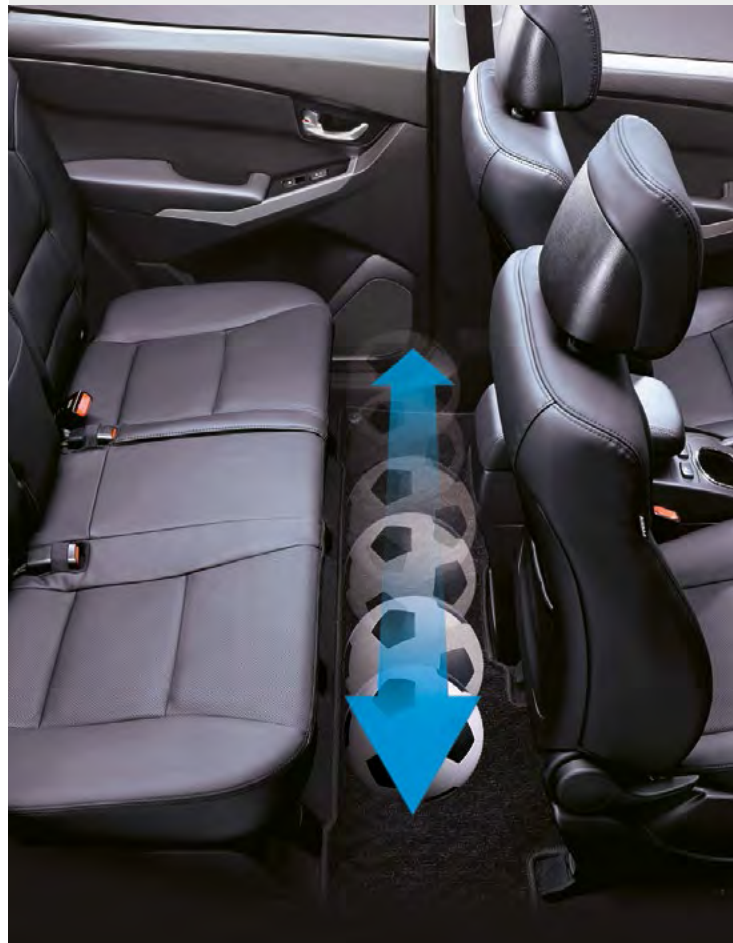

CONTEMPORARY INFOTAINMENT

Korando SE has a high quality six speaker audio with iPod and Bluetooth connectivity and steering wheel controls. Korando EX upgrades to a stylish 7" touch screen with rear view parking camera, whilst Korando ELX adds TomTom navigation to give the best in contemporary infotainment.

OTHER FEATURES

THOUGHTFUL FEATURES

Korando is specified with cruise control across the range to aid efficient driving. Further touches include an interior packed with enough storage spaces to swallow the inevitable kit that's a requirement of modern life, with cup holders, spaces for phones and bins for larger objects thoughtfully designed into the cabin.

REAR SEAT RECLINE

Korando's rear seat can be reclined by up to 17.5 degrees to obtain the best possible angle for passenger comfort.

FLAT REAR FLOOR

Passenger comfort is also enhanced by the flat rear floor which allows three adults to travel in comfort.

HEATED SEATS

A marvellous comfort on those cold winter days, Korando EX has heated front seats and ELX heated front and rear seats.

NEW 2.2 LITRE DIESEL ENGINE

Designed to meet the tough new Euro 6 emissions standards, SsangYong has developed a more powerful and efficient turbo diesel unit using contemporary technologies.

POWER TO PERFORM

Korando's new 2.2 litre diesel engine is clean, efficient and powerful. It develops 178PS @ 4000rpm and 400Nm of torque between 1400 and 2800rpm giving a wide spread of power – enough whether towing, off-roading or heading to the supermarket.

In towing, numbers certainly tell the true story – Korando's sturdy construction and strong engine performance give a 2 tonne towing capacity across the range.

Korando is available with either a 6 speed manual or an Aisin 6 speed automatic gearbox.

AISIN 6 SPEED AUTOMATIC TRANSMISSION

This proven unit made by Japanese transmission experts Aisin is used in SsangYong's Tivoli, BMW's MINI and several Peugeot models.

TORQUE ON DEMAND 4X4 SYSTEM

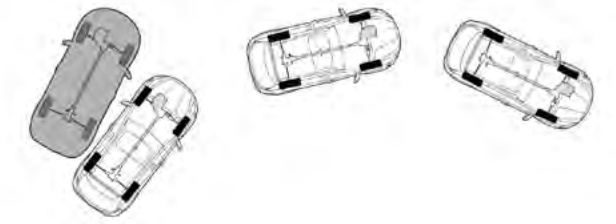

Korando's Torque On Demand 4x4 talks to itself, thinks and acts many times a second. A network of sensors maintain a stream of reports to the system's central processor, which makes lightning quick decisions about power and braking. The result: you're always serenely in control.

Korando features an advanced 4x4 system that operates in two modes, depending on conditions and settings.

In auto mode and in normal conditions, Korando remains in two wheel drive to optimise fuel efficiency. When sensors detect a potential loss of grip, the system switches to four wheel drive mode.

For very loose or slippery surfaces, the 4x4 system can be locked to allocate drive equally between front and rear wheels. This provides supreme grip and control for low-speed manoeuvres.

Korando also features Hill Start Assist - a great ally when towing, this system acts like an automatic handbrake to prevent rolling backwards during a hill start.

ELECTRONIC SAFETY AIDS

All Korando models are fitted with anti-lock braking system (ABS), electronic brakeforce distribution (EBD), electronic stability programme (ESP) and active rollover protection (ARP) which employ a variety of sensors to detect imminent loss of control or rollover, and uses electronic control of the vehicle systems to maintain stability and traction.
