

REXTON V

SSANGYONG

Rexton is characterised by a blend of elegance and traditional 4x4 values and the latest Rexton W brings things bang up to date. The exterior styling has been enhanced by a new grille and projector headlamps to create a totally contemporary look. Rexton W blends the multi-role flexibility of great off-road performance with the comfort and equipment levels of a luxury saloon.

A close-up view of the car's interior, focusing on the dashboard and steering wheel. The dashboard is black with silver trim around the air vents and the central infotainment unit. The steering wheel is black with a silver logo in the center. The instrument cluster is visible behind the steering wheel.

There is a feeling of desirable luxury on entering the cabin – black leather* is complemented by metal grain trim, the front seats are electrically adjustable* and heated to add comfort for those chilly days. The driver's seat features a memory function* to make swapping seat positions child's play.

* EX only

A wide-angle view of the car's interior, showing the front and rear seats. The seats are black leather with silver stitching. The dashboard and center console are visible. The car is parked near a body of water with hills in the background.

However, it's a luxury that is matched by practicality. Seven seats are standard, with the rear row conveniently folding when extra luggage space is required - to maximise internal space, a five seat option is available. Automatic air-conditioning makes controlling your environment straightforward and the standard in-car-entertainment unit provides CD, iPod and radio functions and will connect to your phone via Bluetooth. There is a SatNav upgrade available that also includes a DAB radio to provide up to the minute in-car-entertainment.

STRONG AND EFFICIENT DIESEL POWER

Rexton W is powered by SsangYong's own 2.0 litre e-XDi200 diesel engine offering a level of performance and refinement that has already been tested, proven and praised in the marketplace. Delivering 155PS/4,000rpm and 360Nm/1,500-2,800rpm this efficient unit provides massive pulling power and is designed to provide low end torque whatever the conditions.

**A SMOOTH DRIVE, ON OR OFF THE ROAD**

There's the choice of a 6-speed manual or 5-speed Mercedes-Benz T-Tronic automatic transmission that ensure world class durability, slick gear changes and strong performance on or off road. The selectable 4x4 system provides reassurance whatever the job and whatever the weather. And when the going gets really tough you can select low range which splits the torque equally between front and rear axles to provide all round traction and ensure optimum grip across the most challenging terrain.

HANDLES THE LOAD

With its 3 tonne towing capability, Rexton W will also make light work of hauling a large caravan, horsebox, boat or work trailer. The strong ladder chassis provides a substantial towing platform, add to that 4x4 capability, and Rexton W can handle all your towing requirements.

IN-CAR-ENTERTAINMENT

The standard fit radio/CD unit provides the option of RDS radio, CD, MP3 and Bluetooth connectivity to iPod and mobile phone.

MEMORY FUNCTION*

There are 3 memory functions for the driver's seat – simply save the seat position for 3 drivers and return to that setting at the touch of a button.

*Rexton EX only

CRUISE CONTROL

Simply set cruise control at a given speed and enjoy relaxed and efficient motoring.

ISOFIX FITTINGS

ISOFIX child seat anchorages are fitted to the outer seats in the second row to provide a firm connection for child seats.

* At maximum towing weight the trailer must have remote braking capability. ** A guide to fuel economy and CO2 emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO2 emissions. CO2 is the main greenhouse gas responsible for global warming.
