PREVIA GS & GL the perfect solution

The Previa doesn't just give you extra space - it gives you optimum space. The powerful engine has been cleverly mounted beneath the floor - releasing even more room for useful carrying capacity.

So the GS and GL can be used as really spacious 8 seaters. Or with the third row of seats folded away, they can accommodate 5 people and over 62 cubic feet of luggage.

Whether it's weekends away, outdoor activity holidays or simply delivering the kids to school, the GS and GL will transport everything and everybody in greater comfort and luxury.

Both models are generously equipped by any standards. There are power front windows. An electric front sunroof. And on the GL a manual front and a large sliding electric rear sunroof.

Safety has been further reinforced - with pre-tensioners and force limiters on the front seat belts. The GL is further refined by the addition of ABS and standard automatic transmission.

The Previa GS and GL. The capacity to solve travel problems whatever their size.

4 door 2.4 litre 16v **GS** manual & automatic **GL** automatic

PREVIA GX cool inside and out

4 door 2.4 litre 16v GX automatic

The GX isn't only the top Previa in the range. It's clearly the top MPV on the road.

In fact, in this 7 seater model you'll find a degree of refinement associated more with executive aircraft than land-based transport. Like the two captain's seats in the middle row that can swivel to face the rear. Perfect for impromptu small business conferences.

There's cruise control for relaxed long distance driving. The luxury of air conditioning for both front and rear passengers. Dual sunroofs and a cool box are standard. And the new bronze tinted glass featured on the Previa gives improved heat absorption to keep the cabin cooler.

Cool is also the keynote of the GX's exterior styling. Note the sporty rear spoiler, distinctive roof rails and gleaming alloy wheels. The Previa GX. A multi-purpose vehicle specification that's nothing short of exceptional.

6 CUP HOLDERS

PREVIA COMFORT

seriously spacious

The exceptionally well appointed interior of the Previa GX showing rotated captain's seats.

The interior of the Previa is unlike anything you've encountered in all your driving experience. You'll find the high driving position gives an unprecedented view of the road ahead. At the same time, large all round windows give virtually uninterrupted 360° visibility.

Generously upholstered seats provide outstanding support and superlative comfort, trimmed in luxurious blue velour material. But what truly amazes is the sheer versatility of the Previa's cavernous interior. There's a tremendous choice of configurations. Simply switch the emphasis from seating to cargo space – or vice versa – as the needs of each journey change.

With the rear two rows of seats folded flat, there's even ample room for a full length snooze for two. And on the GX, the centre row captain's seats swivel rearward for face to face conversations.

Step inside the Previa. Once aboard, you'll agree nothing else compares.

The interior of the Previa is not only remarkably spacious but also incredibly versatile.

PreviasGX

PreviasGL/GS

Both the GL and GX feature twin sunroofs, the front manual while the rear is electric. The GS comes with a single front electric sunroof.

Centre console storage.

A cooler compartment under the dashboard in the GX.

Retractable centre armrests on front seats and on both sides of captain's seats (GX)

PREVIA CONTROL

command performance

Naturally the steering is power assisted for greater manoeuvrability.

For a more comfortable driving position, the steering column on all models is tilt adjustable, and the height of the front seatbelts can be altered.

The dashboard offers clear, easy to read instrumentation and incorporates a tachometer and headlamp levelling facility.

Intermittent wipers front and rear are standard on every model.

All models are equipped with heated electric external mirrors and power front windows.

All Previa models feature six speaker RDS audio systems.

The ergonomically designed dashboard of the Previa brings everything to hand effortlessly.

You'll always feel firmly in charge driving a Previa. Every control you'll ever need is readily to hand – and so simple and convenient to operate.

Whether you're levelling the headlamps, adjusting the tilt of the power assisted steering wheel or switching on the superb 6 speaker RDS stereo unit, there's only one word for it. Effortless.

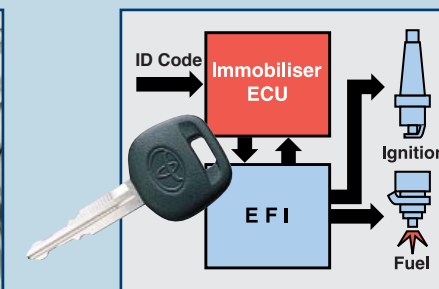

The dashboard doesn't just look extremely stylish. Clean instrumentation and fumble-free switches are designed to take the stress out of even the longest night-time drive.

Controls for the electric front windows are instantly accessible. And on the GX, activating the cruise control and air conditioning is simplicity itself. Easier controls are safer controls too.

Whatever Previa you choose, you'll find it a unique hands-on experience.

Overhead air conditioning, standard on the GX (not to UK specification)

Central locking and a remote alarm immobiliser are standard on all Previa's.

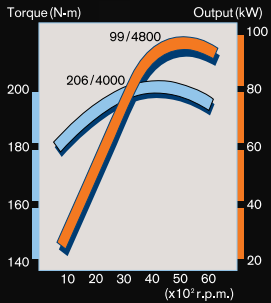

Switches for the power door locks and mirrors .

PREVIA TECHNOLOGY & SAFETY

a fresh approach

A 2.4 litre 16 valve engine combines smooth top-end power, torque for effortless pick-up and increased fuel efficiency.

The specially designed engine is tilted to maximise cabin space.

The advanced suspension system incorporates MacPherson struts and offset coil springs for a smoother ride and predictable handling.

The 2.4 litre 16 valve twin cam fuel injected engine can deliver 151 lbft of torque at 4000 rpm.

Sophisticated safety features include twin airbags, side impact beams, reinforced pillars and a collapsible, energy absorbing steering column. The GL and GX also come with ABS.

All models are now equipped with front seatbelt pre-tensioners and ALR/ELR 3 point seatbelt anchors on the outer seats of the first rear row for improved restraint on child seats.

For a more comfortable driving position, the steering column on all models is tilt adjustable, and the height of both front seatbelts can be altered.

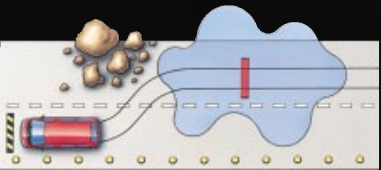

A childproof lock on the sliding door and remote central locking are standard.

For easy access fluid reservoirs are conveniently located under the bonnet.

Innovative mid-engine layout creates a low centre of gravity producing car-like handling and road holding.

Anti-lock Braking System, on GL and GX, helps prevent wheel lock up for enhanced stability.

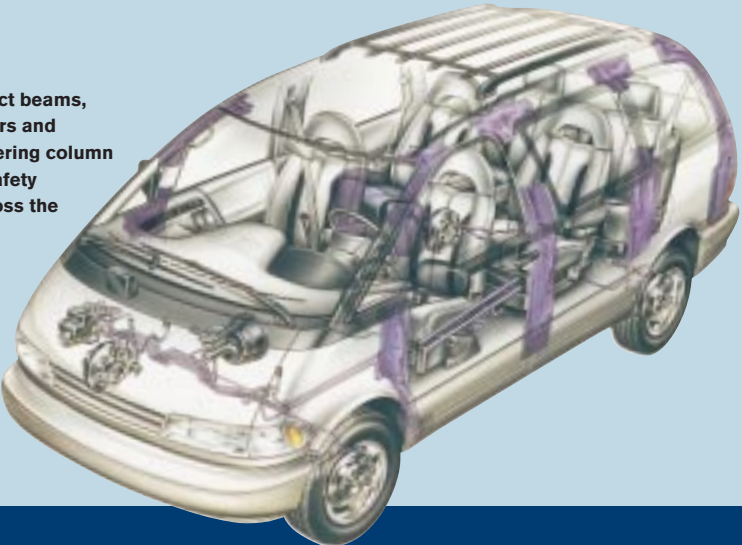

New thinking in technology has paid handsome dividends for the Previa. And its passengers and drivers. Not least the mid-engine layout that gives a low centre of gravity - for controlled handling that's more akin to car performance than a multi-purpose vehicle. There's also a highly advanced independent suspension system that helps the Previa hold the road and corner safely. No matter how many people and their luggage are on board. Even routine maintenance has been simplified. All fluid levels that need checking are conveniently located under the bonnet. Innovation has also been freely applied for maximum safety. From sophisticated side impact beams and reinforced pillars - to height adjustable front seat belts. The Previa remains one of the most technically accomplished MPV's on the market.

Driver and passenger airbags are standard on all models.

Twin side impact beams, reinforced pillars and collapsible steering column are standard safety equipment across the Previa range.
