

1991 MODELS. EDITION NUMBER 2

VAUXHALL
CALIBRA

VAUXHALL

Few superlatives are adequate for Calibra, the most exciting car ever to bear the Vauxhall badge. Few words can do justice to its breathtaking looks and world-beating aerodynamics. Few drivers will have the opportunity to experience the satisfaction of ownership; yet like all rare and precious commodities, its value and purity are universally admired and desired.

THE CLASSIC COUPE

In Calibra the dreams of the designers have become reality, and the graceful sweep of an artist's pen has created a car that's as exciting, exhilarating and purposeful as it is practical, efficient and versatile.

In spite of exuberant good looks which belong on the sort of sports car normally confined to the arena of youthful folly, Calibra is every inch as economical, reliable and just plain usable as any of its more prosaic counterparts. In everyday life it reflects absolutely Vauxhall's absolute commitment to customer care.

And, fittingly, it reflects absolutely the degree of artistic commitment of one of the modern car industry's most successful design studios - which has produced the award-winning Astra and Carlton, the elegance of the Senator and, of course, the aesthetically brilliant Cavalier.

This is the studio that has taken the GM mastery of aerodynamic excellence and translated it into attractive, individual designs time and time again. In Calibra that teamwork has been honed to a fine perfection. The result is a car that sets new records for production car aerodynamics and yet remains breathtaking in its extreme good looks.

VISION ON

Interior design presents one of the toughest problems for any car maker. Not only must it reflect the style and shape of the bodywork, and maintain the drama of each sloping curve of the sheet-metal, but it must also bend a knee to the science of ergonomics.

Putting people swiftly and comfortably in touch with a working environment is what the science of ergonomics is all about, and making that workplace a pleasure to be in is what design is all about.

Calibra's designers have achieved all this and yet there's no evidence of that bended knee; the interior appears to have been designed for its pure aesthetic value and, like the exterior, shows no sign of compromise.

And yet it is superbly functional and efficient. Clear, accessible information in the driver's eyeline is matched by controls that are easy to find, easy to reach and easy to operate.

And while it may be functionally simple it contains all the sophistication you'd expect from a car at the forefront of its class: there are electrically operated front windows, sunroof and door mirrors – plus, to take luxury to new heights, every model has the option of a full air-conditioning system so advanced it even keeps the glovebox cool.

Clear simplicity in design and layout belies the sophistication of the Calibra's standard features.

COMFORT IN THE KNOWLEDGE

Own a dramatically-styled sports coupé and you expect to sacrifice space and equipment in favour of excitement. Not so the Calibra.

There's no doubt that Calibra is a genuine four-seater, with a surprisingly spacious passenger compartment – with more room in the back than its rakish glassline suggests. Make no mistake: this is a practical hatchback with a tailgate that opens to reveal a luggage area which can be enlarged by dropping the 40/60 split-folding rear seat to create a load area that can handle 34.6 cu.ft of luggage.

But, ultimately, this is a driver's car with a sporting heritage – you know it the minute you ease into the height and rake-adjustable sports bucket seats. New Mexico cloth patterns exclusive to the Calibra provide an individuality strengthened as the strong graphic theme introduced on the door panels continues into the rear passenger compartment. This serves to emphasise the free-flowing shape of the exterior and also creates an all-enveloping cockpit atmosphere in which skilful drivers can perform with feeling and passengers can relax, comfortable in the knowledge.

There's reassurance, too, in knowing that your Calibra is protected throughout by the very latest in electronic security alarm systems.

Door mirrors are electrically-operated and heated.

Split-folding rear seat creates ample space for bulky items of personal or business life.

CALIBRA 2.0i 8v

Though sheer, undiluted style may well be the major prerequisite for a sports coupé, looks alone are not enough to gain admission to the exclusive club of high performance touring cars. Nor yet is sheer speed; touring in the grand style requires brilliant handling, effective acceleration and effortless cruising, plus an easy ride and quiet running. For driver and passengers alike, the equation must add up to day-long comfort.

In virtually every respect the equal of its 16-valve brethren, the 8-valve Calibra represents a perfect compromise between power and economy. With all the inspired styling of the powerful 16-valve, the 8-valve Calibra is eminently affordable and yet remains enormously satisfying to the enthusiast in every driver.

Deep reserves of low-down torque ensure 'shove-in-the-back' urge in the lower gears, and top-end performance exceeds every expectation. Its 5-speed close ratio gearbox is a joy to work through on mountain, motorway or sweeping plain, but the relaxed enjoyment of the optional 4-speed automatic transmission provides its own kind of pleasures, especially with its three electronically controlled operating modes - Economy, Sport and Winter.

Optional at extra cost, these alloy wheels bring a personal touch to the 8-valve Calibra.

Electrically-operated, spoiler-style sunroof tilts or slides, giving fresh air and fresh style.

THE POLISHED PERFORMER

Once vaguely referred to as streamlining, pundits now call it aerodynamics; engineers call it airflow management and scientists measure it as a drag coefficient - Cd. In its 8-valve guise, Calibra records a record-breaking Cd of 0.26, but by any name it parts the air ahead better than any production car in the world.

But record-breaking figures alone are of no value in a road car, though its smooth efficiency is immediately apparent. Follow its knife-edge profile and the sleek nose housing staggeringly thin, flush-fitting headlights. The long, sloping bonnet leads into smooth-fitting bonded glass, softly-curved door mirrors and the smooth, virtually separation-free sheet metal that flows inward and climbs towards the aggressively high, tapered tail, merging delicately with the acutely angled rear screen.

Nor is this Art for Art's sake. Though eye-catching looks are part of the equation, that low Cd figure brings better driving stability, a higher top speed, better fuel efficiency and minimal wind noise as just some of its practical benefits. Occasionally, in the complex and contrasting world of car design, the blend of art and science result in record-breaking achievement and near-perfect symmetry. Calibra is that result.

Rounded pillars, the dish and steeply raked screen, sill extensions, trailing edge spoiler and the semi-flush, frameless side windows all play a vital aerodynamic role.

There's no need of a wind tunnel; it's clear that Calibra's flowing lines offer a bare minimum of resistance to the air.

Any car that looks as good as Calibra ought to live up to its promise. The 16-valve Calibra fulfils every expectation in stirring fashion.

The dual cam 16-valve is an engine already verging upon legend, with 150PS available at 6000rpm and delivered with an easy surge. Just as easy is a 0-62mph sprint of just 8.5 seconds and a level of performance more usually associated with exotic supercars.

The sophisticated techniques which produce all this power are the same as those that give Calibra its all but bottomless reserve of torque – peaking at 196Nm at 4800rpm, with 90% of the maximum available all the way from 3300rpm to 6000rpm – and that make it so flexible and driveable at any speed.

All this goes hand in hand with an engine that runs on unleaded fuel and reduces harmful exhaust emissions by 90% thanks to a 3-way catalytic converter.

Stopping power too is impressive in its efficiency. Large-diameter rear brakes and ventilated front discs – plus electronic ABS – make that a certainty. With uprated suspension (for faster steering response) and gas pressure shock absorbers to ensure supple control of its four wide, low profile tyres even on poor road surfaces, the 16-valve Calibra delivers optimum handling.

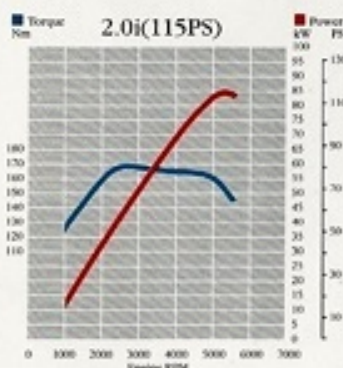

All Calibras have the very latest electronic anti-lock braking system (ABS).

As Europe moves towards uniform exhaust emission legislation, GM engineers have developed two engines for the Calibra – 2.0i fuel-injected units with either 8 or 16 valves – combining performance, economy and low maintenance with clean emissions. Both engines have a three-way catalytic converter as standard, and must be run on unleaded fuel. Thanks to the skill of the engineers, these twin contributions to a cleaner environment bring no sacrifice in power or economy, and both 8-valve and 16-valve Calibra are smooth, efficient and exhilarating to drive.

The 2.0i 8-valve engine combines exceptional torque with lively performance and excellent economy.

2.0i CAT 115 PS 8-VALVE

The recently introduced 2.0i 8-valve engine is a beautifully modern design that combines exceptional torque (170Nm at 2600rpm) with lively performance and excellent economy for truly flexible motoring.

Advanced features include a lightweight, thin wall cast iron block, a light alloy cylinder head with a smooth-running, belt-driven single overhead camshaft, and a compact combustion chamber incorporating specific quench areas opposite the spark plug for reduced flame travel and increased burn rate.

2.0i CAT. 150PS 16-VALVE

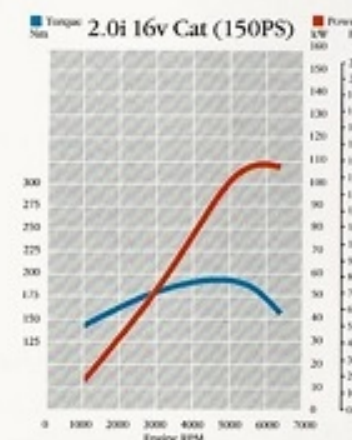

The 2.0i 16-valve powerhouse of the Formula Vauxhall Lotus series is also a regular production engine that maintains Vauxhall's standards for excellent fuel efficiency, low emissions, low weight and easy maintenance. This unit has won much acclaim in Astra GTE and Cavalier GSi 2000 guise. When assessing the 16-valve engine in its road test of the Cavalier GSi 2000, *Autocar & Motor* was inspired to comment: 'It has one of the most fuss-free, even power deliveries in its class.' The engine also incorporates an impressive list of design features such as twin, hollow-cast overhead camshafts, sodium-cooled exhaust valves, hydraulic tappets, polished ports and a fabricated, stainless steel exhaust manifold.

INSTANT RESPONSE

The 16-valve engine is controlled by the state-of-the-art Bosch Motronic M2.5 engine management system. Under its all-knowing umbrella come ultra-efficient sequential fuel injection and a selective knock control that adjusts ignition timing automatically, depending on an equation which includes throttle position, air intake volume and even the quality of the fuel in the ignition chamber. The result is an engine that

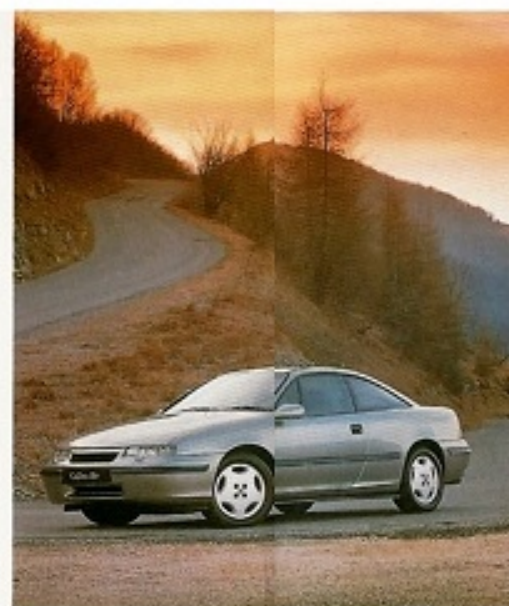

never fails to provide an instant, satisfying response, whatever is asked of it. With maximum power of 150PS at 6000rpm and peak torque of 196Nm at 4800rpm, action speaks far louder than words. But *Autocar & Motor* expressed it admirably in its assessment of the 16-valve unit when it commented: 'The torque curve – a much more informative measure of slogging strength – is so flat it lets the car accelerate cleanly and quickly from 1500rpm in any gear.'

At least 90% of peak torque value is available from 3300rpm to 6000rpm.

SELF-DIAGNOSTIC CAPABILITY

The exact adjustment of the ignition timing and the quantity of fuel injected is controlled precisely by a sophisticated Bosch Motronic M1.5 engine management system, processing data relating to airflow rate, engine load and temperature up to 5000 times per second to optimise the balance between power, economy and emissions for all driving conditions. The innovative M1.5 unit also provides a self-diagnostic capability – recording information that can subsequently be analysed by trained Vauxhall service technicians.

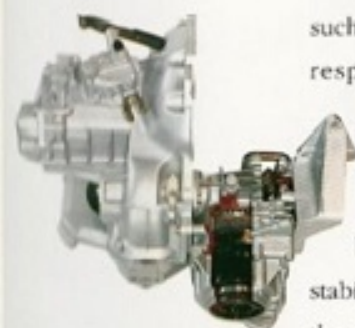

The 150 PS 2.0i Cat. 16-valve engine features hollow camshafts, sodium-cooled exhaust valves and polished cylinder head ports.

Vauxhall's state-of-the-art, permanent four-wheel drive system won widespread acclaim when it was introduced on the Cavalier. Added to the already brilliant handling of the 16-valve Calibra, the result is a car with all the answers. It looks stunning, and performs superbly. And with four-wheel drive it is supremely controllable, handling virtually any motoring predicament with consummate ease. In that sense alone, four-wheel drive is a safety feature of remarkable effectiveness.

Based around a central viscous coupling, Calibra's 4x4 system has the ability to vary the torque between the front and rear wheels automatically, ensuring optimum grip whatever the road surface. Under extreme conditions, such as ice or snow, the rear axle can take responsibility for 100% of the drive.

When braking at speeds in excess of 15mph, however, rear-wheel drive is automatically disconnected by an integral clutch, improving stability and allowing unrestricted use of the anti-lock braking system.

As in every other facet of its design Calibra mixes practical solutions with wild excitement, and this ultimate Calibra takes logic to the limit as a dynamic masterpiece that appeals to the heart as much as the head.

Vauxhall's high-tech 4x4 system varies front/rear torque automatically for gripping traction in all conditions.

THE FUSION OF ART AND TECHNOLOGY

In creating a look, car designers go all the way and then back-pedal. Engineers tread the opposite course. They go as far as they can, and then try to push the frontiers of engineering, science and technology still further.

Calibra is unusual because it appears in the metal virtually as drawn in the original sketches; no compromise, no backing off. And under its vividly

exciting bodywork is a wealth of engineering technology.

UNRIVALLED STABILITY AND COMFORT

Calibra sets out in life blessed with excellent directional stability and plenty of passenger legroom.

Calibra is stringently tested in climatic extremes.

The front wheels are controlled by MacPherson struts while the rear features an independent trailing arm system to

maintain consistent performance over a full range of load conditions. The result is a car which deals with brisk driving but not at the expense of passenger comfort.

SPEED WITH SAFETY

All Vauxhalls are designed with extensive built-in safety features and from its rigid passenger cell to crumple zones front and rear, Calibra runs true to form.

Some of Calibra's safety measures have been specially developed, such as the sports steering wheel. Under impact it reacts - to a restrained driver - by the rim, spokes and central hub collapsing to reduce peak forces by over 50 percent. For unrestrained drivers the wheel adapts to the impacting body while the main energy absorption occurs in the steering column.

The standard ABS system adjusts braking pressure on each wheel to avoid skidding.

ELECTRONIC ABS

Naturally the latest-generation electronic anti-lock braking system is standard, working in conjunction with the disc brakes front and rear. With sensors on each wheel the ABS adjusts braking pressure many times a second in order to prevent skidding as a result of heavy braking.

AUTOMATIC TRANSMISSION OPTION

The latest, electronically-controlled, AF20 four-speed automatic transmission is available as an option on the 8-valve Calibra. The entire gearbox is controlled by a sophisticated computer package linked to the engine management system, smoothing full-throttle shifts by instantaneous changes to ignition timing.

The advanced system also provides a choice of operating modes. In normal ECONOMY driving the highest ratios are engaged as quickly as possible and, above pre-determined speeds, the lock-up clutch for the torque converter engages in third and fourth gears to prevent energy-wasting slip. SPORT is for those occasions when you want to make the most of Calibra's full potential, allowing higher engine speeds for maximum performance. WINTER mode is a safety setting to provide smoother

Sophisticated 4-speed automatic transmission features three selectable driving modes.

and safer starts in conditions of ice and snow by starting the car from rest in third gear, reducing the risk of wheelspin.

Once 50mph has been reached, the transmission reverts to ECONOMY mode. Normal automatic override is provided in any mode by using the selector lever to engage D-3-2-1 as required.

Painstaking attention to detail in the wind tunnel resulted in a 0.26 Cd figure.

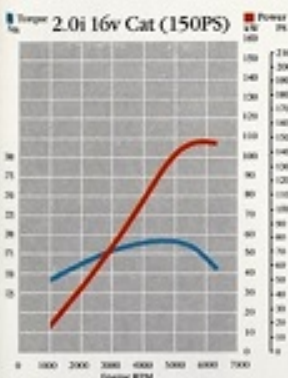

ULTRA-THIN HEADLAMP UNITS

Engineering excellence extends to the Calibra's exterior as well, dramatically re-emphasising the balance between artistic integrity and scientific achievement. Consider the visual impact of the ellipsoidal headlamp units - just 70mm high but combining high-low beams, fog lights and turn indicators under a single lens with a flush-fitting housing. Not only are they a world innovation but, through the use of CAD/CAM computer systems, these stunningly effective lamps produce 40% more light than earlier ellipsoidal versions, resulting in a longer beam throw for vastly improved night-time vision.

Innovative design - the roof-mounted radio aerial incorporates the rear screen washer nozzle.

A side profile of a silver coupe. Below the car, two dimension lines are shown. The first dimension line spans the wheelbase and is labeled 102.4 (2,600). The second dimension line spans the entire length of the car and is labeled 176.9 (4,492).

Vauxhall's long-standing reputation for fitting high quality audio equipment is maintained by the new Calibra which features the superb Philips DC 670 stereo radio/stereo cassette player.

This advanced unit switches on and off with the ignition, but can also be turned on without using the ignition switch simply by pressing the volume knob. To ensure you don't run down your battery, the DC670 switches itself off after one hour of independent operation.

- 4-digit Philips security code burnt into memory chip of the unit – cannot be erased
- Microprocessor-controlled PLL quartz digital tuning
- 20-station electronic memory

- Additional 10-station autostore memory
- Transflective liquid crystal display
- Automatic three-level search tuning
- Up/down manual tuning
- Single button station storage
- Autoreverse stereo cassette deck with LCD tape direction indicator
- Manual tape direction reverse facility
- Radio reception during fast wind
- Auto cassette insertion with auto start
- Auto replay after fast wind to end of tape
- ESC Electronic Speed Control
- Autostop: tape 'salad' protection
- Front/rear fader control

- Illumination of radio controls with car lights on
- Continuously variable tone control
- Stereo balance control
- 4 x 4.5 watts output

VAUXHALL. NO. 1 FOR CUSTOMER CARE

Calibra models are just part of the comprehensive range of Vauxhall cars – one of the widest in the UK. And one which has an enviable reputation for sound quality, affordable technology, attractive styling and 'driveability' too.

There's also the added peace of mind of Vauxhall Assistance and Vauxhall Price Protection. Order a new Calibra from the current available range offered and the price you are quoted is the price you pay – irrespective of any subsequent price rises between placing your order and delivery of your new car. The only qualifications are that your order must be placed no more than three months ahead of your required delivery date and that you take delivery as soon as the car is available.

And when you buy a Calibra, you can be sure that you and your car will have the full backing of Vauxhall, part of the world's largest motor manufacturer – General Motors.

Vauxhall has one of the largest franchised dealer networks in the UK. With over 600 Vauxhall dealerships, you're never far from one.

As the list of services shows, your Vauxhall dealer is able to provide much more than new and used cars. When it comes to service and parts, he is committed to providing high standards of customer care and support. He can also arrange motor insurance, extended mechanical and breakdown protection and may also offer car hire and leasing.

The benefits of buying Vauxhall are apparent even when you come to sell. With such a well established dealer network and with a range of cars renowned for their reliability – and for their excellent 'residual' values – trading in for another new Vauxhall can be a very attractive proposition. And, with all the attendant benefits that come with this fine range, a wise one.

THE VAUXHALL WARRANTY

warranty that – unlike those of some manufacturers – requires no periodic checks. And both warranties are transferable to any new owner if the car is sold within the warranty periods.

VAUXHALL AFTERSALES

As part of the Company's total customer care concept, Vauxhall's Service and Parts operations are fully integrated into one customer-focused organisation – Vauxhall Aftersales.

The aim, simply, is to provide Vauxhall owners with the best after-sales care in the motor industry.

Vauxhall have forged a strong reputation for minimal routine servicing requirements as a way of lowering overall running costs for Vauxhall owners.

Factory-run courses ensure that dealer technicians are always abreast of the latest developments and are expert in the use of the sophisticated electronic test equipment that is such an important feature of the modern Vauxhall dealer workshop. All of which points to the advantages of entrusting servicing to the people who know your car inside and out – your local Vauxhall dealer.

Naturally, genuine Vauxhall replacement parts are a key element of the service operation. It's therefore reassuring to know that Vauxhall's massive central warehouse has an inventory of around 24 million replacement parts – all rapidly available for urgent despatch to supplement your dealer's stock.

Significantly too, genuine Vauxhall replacement parts also carry a 12 months unlimited mileage warranty against defect.

And when you're abroad it's equally reassuring to have this service and parts backing at GM service points located throughout Europe.

Most Vauxhall-Approved accessories too, are tailored to fit each Vauxhall model to ensure

Vauxhall Assistance is the most comprehensive motoring assurance package in the UK. Designed and run in conjunction with the RAC, it is automatically extended to every new Vauxhall car for the first 12 month warranty period. Its wide-ranging list of benefits includes: full roadside rescue and recovery including 'at home' service, replacement loan car* and overnight accommodation* where necessary, European cover and a helpful Accident Management Service.

You'll also be entitled to many other RAC benefits including free technical advice on all aspects of motoring, holiday discounts, free legal advice and support, and full European travel insurance and booking service. Ask your dealer for full details.

*subject to certain limitations

Vauxhall Rental offers an extensive range of vehicles from a network of registered dealers throughout the United Kingdom.

Only Vauxhall dealers offer Vauxhall Rental, so you can be confident that the vehicle you select will

Mechanical and Breakdown Protection

Vauxhall Sureguard is one of the most comprehensive mechanical and breakdown insurance schemes offered by any manufacturer.

For a period of up to four years, it offers extended cover against mechanical failure as well as all the regular benefits of Vauxhall Assistance. Plus there's Sureguard Business Plan, specially tailored for the high mileage business driver, with its own special benefits being available for two or three years from the car's registration date.

Ask your local Vauxhall dealer for full details.

Are you paying more to insure your new Vauxhall than you need to?

The Vauxhall Insurance plan could bring you substantial savings, since it is designed to provide Vauxhall owners with special rates. The benefits are available to owners of all Vauxhall products of any age, have the full backing of Vauxhall Motors Ltd, and the security of a Lloyds Motor Insurance Syndicate.

Ask your dealer for details, or

A nationwide network of selected Vauxhall dealers provides competitively priced, service-oriented car contract hire to business, professional and local authority users. And the full service is based at a nearby Vauxhall dealership.

Every Vauxhall is eminently suitable for fleet use – on price, on specification, on durability.

Within the Vauxhall range, there is a model to match your need, enhance your company's image and reflect the status of your personnel.

Often, usership can be more beneficial than ownership – through the Master Hire system.

Vehicle leasing has many advantages, not least being the reduced burdens on company finances.

Call Master Hire Leasing on 0926 452557 for the location and number of your nearest Master Hire Leasing dealer. Their Master Hire specialist will be pleased to discuss the financial advantages of contract hire relevant to your business.

Calibra accessories include a rear spoiler and alloy wheels, complementing the car's styling. Also illustrated: a Vauxhall-approved towing hitch and mud flaps

FOR EXTRA PEACE OF MIND

When you own a stunning sports coupé like the Calibra, it's certain to attract a great deal of enthusiastic attention from those who appreciate classic automotive styling. But it's comforting to know that Vauxhall offers Calibra owners extra protection against those few individuals whose 'interest' might be rather less innocent. The Calibra's inventory of security features is impressive:

- Electronic security alarm system
- Central door locking with security deadlock system
- Fuel filler flap and tailgate included in central door locking system
- Closure of powered windows from outside the car by turning the key in the driver's door to 30 degrees
- Security-coded radio/cassette player
- Free security window etching service

The sophisticated security alarm system works in conjunction with the car's deadlock central door locking and not only senses doors, the bonnet or the tailgate being opened but can also detect motion inside the car.

The alarm also protects the stereo system on a separate circuit, immobilises the car through the starter motor and even protects itself against unauthorised disconnection. It is activated by deadlocking the vehicle with the door key and the system is fully protected against false alarms.

FREE CAR LOAN

But if the worst should happen and a Calibra that has been window-etched by a Vauxhall dealer is stolen during the first year of ownership, the owner need only phone Freephone Vauxhall Security (after reporting the theft to the police) and he or she is entitled to the free loan of a car, excluding fuel and insurance, for up to seven days.

Every effort has been made to ensure that the contents of this publication were accurate and up-to-date at the time of going to press (January 1991). However, with Vauxhall's policy of continuous product improvement, the Company reserves the right to change specifications and make modifications to the vehicles described and illustrated at any time.

Vauxhall cars are equipped with components manufactured by various General Motors operating units and outside suppliers.

Any alterations affecting the description and illustrations in this publication will be notified to Vauxhall dealers at the earliest opportunity. Please consult your Vauxhall dealer for the latest information.

The colours reproduced may vary slightly from the actual paint colour or material due to the limitations of the printing process.

It should be noted that Vauxhall dealers are not the agents of Vauxhall Motors Limited and are not authorised to bind the Company by any specific or implied undertaking or representation.
