Plug in versatility

The all-electric Vivaro-e Life means real-world people carrier versatility for those full-on family adventures with little or no compromise. It leads the way with zero emissions and a 143 mile range with up to an 80% charge possible in as little as 30 minutes.

Vehicle range
up to 143 miles*

Charging
up to 80% in
30 minutes*

*Provisional data. The Vivaro-e is a battery electric vehicle requiring mains electricity for charging. Range data given has been determined according to WLTP test procedure methodology. The figures shown are intended for comparability purposes only and should only be compared other cars tested to the same technical standard. The range you achieve under real world driving conditions will depend upon a number of factors, including but not limited to: the accessories fitted (pre and post registration); charging frequency; personal driving style; vehicle payload and route characteristics; variations in weather; heating/air conditioning; pre-conditioning and battery condition. You can obtain 0-80% of the vehicle charge in as low as 30 minutes from a 100kW rapid charging station. Rapid charging stations are widely available across the UK at various locations and their power rating varies, typically from 50kW and sometimes up to 350kW. The charging time may vary according to the type and power of the charging station, the outside temperature at the charging point and the battery temperature. For more information, contact your local Vauxhall Retailer.

Run electric, no compromise

- 1. Charging options:** Simple to charge, with a 50kWh battery pack and a 7.5 kW on-board charger. Opt for the larger 11kW version and charge up in as little as 30 minutes using a DC rapid charger.*
- 2. Electric efficiencies:** Not only capable of seating eight in comfort with all the luggage, zero emissions mean no urban congestion charges. And with up to 143 miles* without having to plug in, there's nothing else like it.
- 3. Specific electric LCV connectivity:** Monitor essential info using the in-cab 3.5-inch digital display. Set delayed charging cycles, search for charging stations and a set navigation route, all from a smartphone app. It's as simple as that.
- 4. Driving experience:** A unique driving experience with car-like ride and handling. An exceptional 260Nm of torque and a powerful 136PS. And an automatic transmission with compact auto shifter plus the ability to switch between three driving modes: ECO, Normal and Power. The regenerative braking system also helps to recharge the batteries.

Fuel economy# and CO₂* results for the Vivaro Life. Combined mpg (l/100km): 38.2 (7.4) – 44.1 (6.4). CO₂ emissions: 182 – 167g/km.

#Figures shown are for comparison purposes and should only be compared to the fuel consumption and CO₂ values of other cars tested to the same technical standard. The fuel consumption achieved, and CO₂ produced, in real world conditions will depend upon a number of factors including, but not limited to: the accessories fitted (pre and post registration); variations in weather; driving styles and vehicle load. The CO₂ figures display a range to reflect the highest value for the highest emitting version with all available options added, through to a minimum value to represent the lowest emitting version in standard specification.
