

The All-New

05 FREESTYLE

A red Ford Freestyle SUV is shown from a front-quarter view, parked on a paved city plaza. The background features several modern, multi-story office buildings under a clear blue sky. In the foreground, there are concrete steps leading up to a large, rectangular stone fountain with water cascading over its edge. Palm trees are visible on the left side of the image.

> THERE'S A BRAND-NEW WAY TO GET AROUND

It's everything you love about a car. And everything you need in an SUV. Outside, its confident stance and athletic instincts will inspire you. Inside, theatre-style seating, a highly flexible cabin, and a cargo capacity larger than many SUVs help you respond quickly and confidently to each day's adventure. And when the sun goes down, its stylish comfort and nimble handling will bring you curbside at the city café. One vehicle. Endless possibilities. The all-new Ford Freestyle.

> THE ADVENTUROUS, ALL-NEW
2005 FORD FREESTYLE

> THE PERFECT FIT FOR ANY LIFESTYLE

You've chosen a life that's incredibly demanding, yet completely rewarding. Along the way, your vehicle should be versatile enough to enhance, not hinder, your journey. In Ford Freestyle, there's spacious room for up to 7 adults. Drivers are positioned for success thanks to Freestyle's Command Seating.TM For 2nd- and 3rd-row passengers, theatre-style seating and a slight rise in Freestyle's elegant roofline allow them to sit higher than the previous row – treating everyone to an exceptional view. In 6-passenger configurations, reclining bucket seats outfit Freestyle's 1st and 2nd rows. If 7-passenger seating is required, a 3-person reclining bench seat for the 2nd row is available. Either option folds down quickly and flips forward effortlessly to gain access to Freestyle's 3rd row. Amenities there include head restraints that adjust to a variety of heights, reading lights, up to 4 cupholders, and small storage bins that are easily within reach. In Ford Freestyle, no passenger takes a back seat when it comes to comfort.

The Higher You Sit, The Better You'll See

Command SeatingTM – From its inception, Ford Freestyle was designed around a Command SeatingTM position. Because the driver's seat height is between that of a sedan and an SUV, benefits include easier entry and exit, a more upright seating position, and an excellent view of the road as you navigate in traffic. Instead of just seeing the road, you'll command it in ways you never expected.

2nd-Row Bucket Seats >>

Standard on SE and SEL with cloth trim.
Standard on Limited with perforated leather trim.

Three's The Charm

Spacious 3rd-Row Seating – Don't be shy about asking adults to sit in the back of Freestyle. Designed to comfortably accommodate a 6'1" male, this 3rd-row bench seat features best-in-class* leg room, head room and passenger volume. Theatre-style seating improves the view, especially of the available DVD Family Entertainment Center's 7" screen. To create 45.9 cu. ft. of convenient cargo space, simply fold down the 3rd-row seat, then flip it toward the rear of the vehicle* for stowage into the cargo floor.

*Class is Medium Crossover Vehicle with 3rd row.

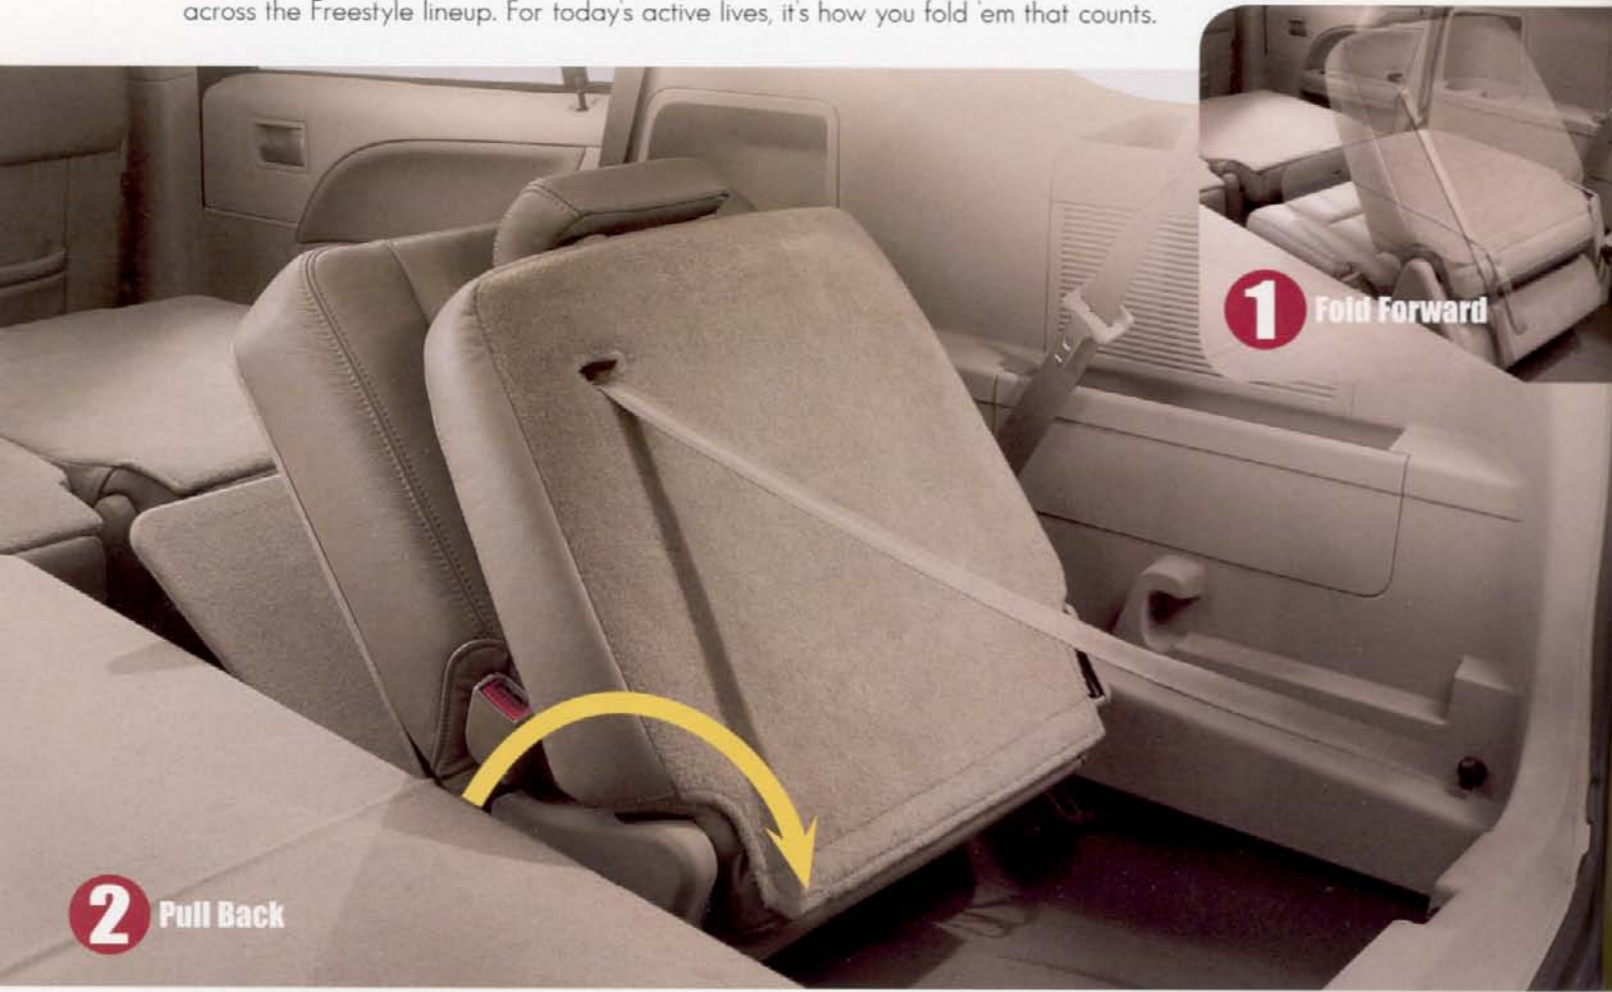

3rd-Row Bench Seat >>

Standard on SE and SEL with cloth trim.

> YOU'LL KNOW WHEN TO FOLD THEM

As your needs in life change, it's nice to have a vehicle that comes along to assist you on the ride. Ford Freestyle provides the ultimate in interior flexibility with a standard fold-in-floor 3rd-row bench seat, fold-down 2nd-row seats and an exclusive fold-down front-passenger seat. So if you need to pick up some decking material at the lumber yard or bring your new sailboard home, you can actually fold down every passenger seat in Ford Freestyle to extend the loadfloor up to 10', maximizing cargo flexibility. In fact, since it was created to satisfy the needs of a new generation, we designed plenty of seating configurations across the Freestyle lineup. For today's active lives, it's how you fold 'em that counts.

Meets Your Needs

3rd-Row Fold-in-Floor Seats – With a purposeful design that's incredibly intuitive to use, Freestyle's 3rd-row bench seat and available 50/50 split seats can quickly disappear into the cargo floor. Simply fold the seats forward (1), then pull them back (2) toward the rear of the vehicle to fold them into the floor (3) and fill up Freestyle with gear. Whatever your needs, Freestyle quickly adapts.

Freestyle Limited – Black Leather-Trimmed Interior

Freestyle SEL - Pebble Cloth Interior

Ready For Adventure

Seating Configurations – Need to carry your surfboards to the beach? Or the family to the amusement park? Just put the appropriate seats up or down and you're on your way. While it's impossible to think of all the ways you can use Ford Freestyle, we've demonstrated a couple here.

Power Moonroof – Thanks to a convenient one-touch-open/-close feature, you can quickly adapt to changing conditions. Available on Freestyle SEL and Limited.
DVD Family Entertainment Center – Includes 7" viewing screen and 2 wireless headphones. Available on SEL and Limited.
Conversation Mirror – Keep an eye on rear-seat passengers with this standard mirror in the overhead console (not available with power moonroof).

> A COMMANDING POINT OF VIEW

Exceptional visibility inspires confidence on the road. Thanks to its Command Seating™ Freestyle positions you for driving success. But the road isn't the only view you'll admire. Freestyle Limited's interior elegance is easy on the eyes as well. With only the finest-quality materials selected, Limited distinguishes itself with unique cream-colored instrument panel gauges and stylish woodgrain accents for a modern, contemporary feel. A leather-wrapped steering wheel and floor-shifter knob complement the heated, leather-trimmed seats. This vantage point is one you'll enjoy.

Designed To Delight

Freestyle SE and SEL— A delight to command, Freestyle SE and SEL's refined cockpit (SEL shown) features instrument-panel and center-console accents resembling carbon fiber for a high-tech flare. A one-touch-up/-down driver's-side window makes drive-thru banking or toll booths a breeze. Solar-tinted glass helps keep the interior cool while the in-dash storage bin keeps your cell phone and PDA close. And the grab bar over the glove compartment says you're ready for just about anything.

Freestyle Limited _ Black Interior

It's What You Do With It

State-of-the-Art Performance – In the all-new Freestyle, every ounce of power works to your fullest advantage. Since its Continuously Variable Transmission (CVT) uses engine torque from the 3.0L Duratec 30 V6 so wisely, engineers were able to optimize both performance and fuel economy. Now *that's* a wise application of power.

> WHEN 203 BEATS 250 HORSEPOWER

In 0-60 testing, the 203-hp Ford Freestyle clocks a faster time (8.65 seconds) than the 250-hp Chrysler Pacifica Touring AWD (9.57 seconds),* in spite of Pacifica's larger engine and higher horsepower. Today, it's not just about power. It's about efficiency as well. By pairing the torque-laden strength of its 3.0L Duratec 30 V6 engine with a class-exclusive CVT, Freestyle's advanced powertrain provides remarkably smooth power and responsive acceleration. 203 hp and 207 lb.-ft. of torque have never felt this good.

*Based on AMCI-Certified testing against '04 class competitors.

> Continuously Variable Transmission

Infinitely Better Performance

Continuously Variable Transmission – Freestyle's advanced CVT gives you the power you need, exactly when you need it. And since the CVT produces a nearly infinite number of drive ratios, you're always treated to responsive, smooth performance.

Wider Is Better

Drive Ratios – With a wider ratio span than a traditional 4-speed automatic, the CVT offers both a strong drive ratio for acceleration, and an economical ratio for highway cruising. The highest drive ratio multiplies engine torque, launching Freestyle from a standing start. At cruising speed, the lowest ratio maximizes fuel economy.

A Smooth Descent

Hill Calibration – Faster, smarter electronics allowed us to develop a calibration just for downhill conditions. If a descending grade is detected, the CVT seamlessly adjusts engine speed and drive ratio to hold a steady speed.

Maximum Efficiency

Big-Engine Performance from a Proven V6 – In simple terms, the CVT allows the 3.0L Duratec 30 V6 engine to perform like a bigger one, but with better fuel efficiency. The demands of quick acceleration or a steep hill climb are answered smoothly because the CVT precisely matches the drive ratio and engine speed to the given situation.

In With The Smooth

Range of Efficiency – An intricate steel-link belt connects the 2 variable-size, high-strength steel-alloy pulleys in Freestyle's CVT. One pulley handles input from the engine while the other sends it to the drive wheels. The effective size of the 2 pulleys is continuously varied to keep your engine in its most efficient range – wrapping improved power feel and better fuel economy into a smooth, velvet-like ride. "The CVT's forte isn't just its range of ratios, but the availability of each and every ratio within that range," says *Road & Track*.**

**Road & Track, January 2004 issue.

> ALL-WHEEL-DRIVE FREEDOM

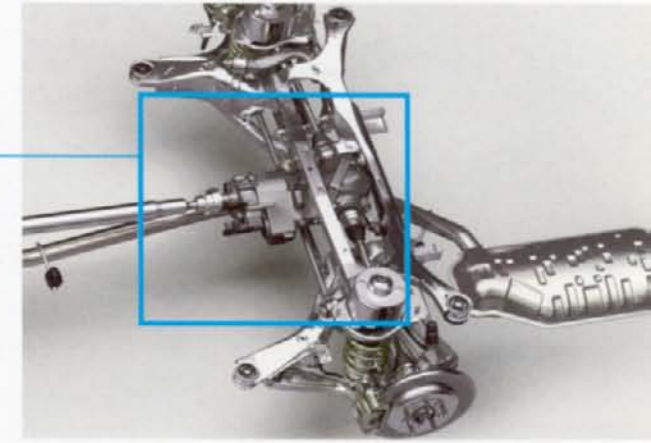

Snow, rain, uneven pavement; it's all in a day's adventure. To help guide you through, there's Freestyle's available All-Wheel Drive (AWD)* that reacts automatically to changes in traction. In normal conditions, this proven system operates in front-wheel-drive mode. But as soon as any wheel slip is detected, AWD delivers power to the wheels with the most traction – maintaining grip in the blink of an eye. It can also direct power side to side on each axle, thanks to Traction Control, allowing you to continue forward motion *even if only one wheel has grip*. That's true driving freedom. That's Ford Freestyle AWD.

Freestyle SE _ Black with Light Gunmetal Metallic Cladding

First Response

HALDEX® All-Wheel-Drive Coupler – The heart of Freestyle's AWD* operation is here, where the system transmits driveshaft torque to the rear axle and wheels. Activation is seamless, smooth – and lightning-fast. As soon as a front wheel begins to slip, the rear axle gets power to aid traction.

All-The-Time Traction

All-Wheel-Drive Operation – No driver interaction is required to activate Freestyle's AWD* system. Instead, a powerful, high-bandwidth Controlled-Area-Network (CAN) bus constantly monitors the following systems to determine when AWD operation is needed: throttle position, engine torque, engine and wheel speeds, Traction Control and the 4-wheel disc Anti-lock Brake System (ABS). If any wheel slip is detected, AWD seamlessly engages to maintain traction.

Thrilling Dry-Pavement Response

All-Wheel-Drive Stability – Buy into the misconception that AWD* only benefits you on slippery roads and you'll miss a whole lot of dry-pavement fun. For example, during rapid acceleration and fast cornering, AWD seamlessly distributes power between front and rear wheels to give you increased control and performance. You won't be aware that it's working, you'll just enjoy the rush behind the wheel.

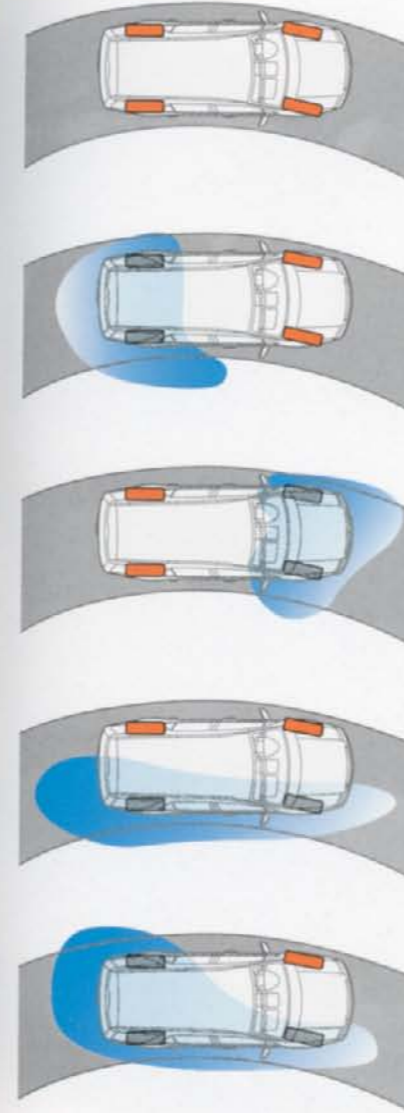

Advantages On Slippery Roads

All-Wheel-Drive Confidence – In a Ford Freestyle equipped with AWD*, making headway on less-than-perfect road surfaces won't be a problem. The system's quick activation helps you get started and maintain control, even under difficult weather conditions. And since the wheels with the best traction receive the most power, Freestyle AWD enhances stability when the weather turns nasty.

Perfectly Matched For Performance

All-Wheel-Drive Teamwork – Teaming AWD* with a Continuously Variable Transmission (CVT) adds CVT's strengths to the system. Because the CVT offers a broad span of drive ratios and optimizes engine power for all driving conditions, the AWD system has the power on hand to plow through snow, mud, sand and other driving challenges. Standard 18" Pirelli tires (below) on Freestyle Limited contribute their own road-gripping abilities.

*Available on all Freestyle models.

Freestyle Limited
Titanium Green Metallic
available All-Wheel Drive

Optimized Suspension Performance

A Better Bushing – To maintain its nimble, car-like ride, 30 bushings in Freestyle's multi-link, independent rear suspension on AWD models (24 bushings on FWD models) work to cushion forces from road seams and large bumps.

> A NATURAL ATHLETE

You play hard. We know that. So Freestyle's compelling combination of SUV-like cargo capacity and car-like ride and handling is designed to leave you always wanting more: one more pass, one more twisty lane, one more chance to give 110 percent. While Command Seating™ keeps you keenly in tune with what lies ahead, a finely tuned suspension and precise steering help you react to any road with confidence and authority. So don't be afraid to push Freestyle as hard as you push yourself. It's trained to respond.

Precisely Tuned

Stiff Subframe – Freestyle's stiff chassis and torsional rigidity contribute greatly to its smooth ride and agile handling characteristics. This solid frame allowed more fine tuning to Freestyle's power rack-and-pinion steering and suspension components (shock absorbers, springs and bushings). And that means more driving fun for you.

In Control

Traction Control – To improve traction on loose or slippery surfaces, Freestyle's available Traction Control uses engine and/or brake controls to reduce wheel spin on front-wheel-drive models. The system senses any loss of traction and steps in to help you regain grip. On Freestyle AWD models, Traction Control makes a proven system even better by allowing AWD to direct torque side to side on each axle. Even if only one wheel has traction, AWD can direct most of the torque there to maintain forward motion.

Well-Adjusted

Power Rack-and-Pinion Steering – The precise driver feedback from its power rack-and-pinion steering system makes Freestyle a joy to maneuver down city streets or two-tracks to the lake. With minimal effort required for turning, positive on-center feel, and a tight turning radius, the steering system intuitively responds to your every input.

Extremely Responsive

Large Rotors and Pads – Thanks to standard 17" wheels on Freestyle (Limited models feature 18" wheels), large rotors (shown below) and disc-brake pads aid in grabbing power and response time. Aluminum dual-piston front calipers exhibit excellent heat-shedding properties, while low-metallic pad materials achieve strong performance and minimize brake dust.

> RAISING THE SAFETY BAR

Innovative safety leadership, for all 3 rows of passengers, defines the all-new Ford Freestyle. Its front, side and rear structural elements were specifically designed and engineered with your safety in mind. Strengthening certain areas against intrusion, and designing others to collapse, absorb or channel crash energy away from occupants, the integrity of Freestyle's vehicle architecture is outstanding. Since a stiff frame is critical to overall safety, Freestyle's solid structure is the bedrock of our commitment to you.

● Safer By Design

Adaptive Steering Column – To minimize the effects of crash forces on the driver, Freestyle's adaptive steering column collapses in different ways depending on the driver's seat position and safety-belt status (belted or unbelted).

● Targeted Strength

Laser-Welded Steel Sheets – To help manage energy in frontal collisions, laser-welded steel sheets of varying thicknesses are stamped into Freestyle's structure. Certain areas, like the front frame rails, are thicker for extra strength.

● Computer-Aided Safety Design

Patent-Pending Front Bumper Plate – Sophisticated crash modeling on a Cray® supercomputer played an integral part in the design of Freestyle's front bumper plate. Engineers found that mounting the bumper plate only to the outer portion of the front frame rails promoted a more even collapse of the vehicle's energy-absorbing structures and reduced intrusion into the passenger compartment.

Cray is a registered trademark of Cray, Inc.

● The Benefits Of SPACE

SPACE Architecture™ – Freestyle's advanced Side Protection And Cabin Enhancement Architecture employs a hydroformed cross-car beam that runs between the door frames, strengthening each bodyside and providing a raised mounting point for the front seats. In a side-impact collision, a bend in the beam's middle serves as a trigger point for deformation, helping to divert crash forces to underneath the seats and away from occupants.

● A Crash Course In Force Management

Frame and Chassis Structure – A tripod design in Freestyle's front structure channels frontal crash forces upward and downward into a high-strength-steel "ring of protection" that surrounds the passenger compartment. On AWD models, even the patent-pending driveshaft is collapsible, allowing it to absorb some of the crash energy of a frontal impact in a controlled manner. Side-impact door beams extend across the 2 strongest areas of the door frame, helping to protect against passenger-compartment intrusion in certain side-impact collisions. In the rear, structural elements meet a more stringent federal crash standard years before it takes effect.

Watches Your Back

Reverse Sensing System - Imagine something telling you just how far you can back up, or letting you know an object is in your way. With this helpful system, you've got just that. Great for parallel parking or backing into the garage, it audibly alerts you to objects behind the vehicle when in Reverse. The closer you get, the quicker it beeps. Available on Freestyle SEL and Limited.

A Curtain Of Protection

Patented Safety Canopy™ System - Ford Freestyle is the only vehicle in its class to offer the available Safety Canopy System with an exclusive rollover sensor. This comprehensive system includes front-seat side-impact airbags for enhanced chest protection, and side-curtain airbags that cover the side windows on all 3 rows of seats for enhanced head protection for outboard occupants. If a rollover is starting or a side-impact collision is under way, sensors determine within milliseconds which of the airbags to deploy. In side-impact and rollover protection, Freestyle confidently leads the way.

> SAFETY & SECURITY INNOVATION

The all-new Ford Freestyle redefines protection. For example, all seating positions receive 3-point safety belts and adjustable head restraints. Pretensioners tighten 1st-row safety belts within milliseconds of an impact and, as the crash progresses, load-limiting retractors "pay out" the belts to reduce peak forces on occupants and help increase protection. Through advanced computer-optimization programs, our engineers evaluated over 50,000 crash simulations to reach the ideal settings for these safety restraints.

Remotely Accessible

HomeLink® Universal Transceiver - After programming the electronic signals from your garage door opener and up to 2 additional home-based units (such as exterior lighting and an estate gate) into the system, the HomeLink Universal Transceiver allows you to activate those devices without carrying any hand-held remotes with you. Available on Limited.

It's Got Your Number

Keyless Entry Keypad - A marvel of common-sense engineering, Freestyle's standard keyless entry keypad allows you to access your vehicle without the key. To enter, just punch in your personalized code. You'll realize its importance the first time you - or your children - lock your keys inside, or when you're at the beach and you don't want to carry your keys with you.

A Light In The Darkness

Security Approach Lamps - For added security and convenience at night, a lamp on the underside of each sideview mirror illuminates the ground around the vehicle - automatically - when you press a button on the remote key fob, punch in your code on the keyless entry keypad, or simply lift a door handle. Standard on SEL and Limited.

Customized Protection

Occupant Protection Systems - On every 2005 Ford Freestyle, the Personal Safety System™ and Occupant Classification System enhance protection for both the driver and front passenger. Utilizing a network of smart sensors, the deployment level of the dual-stage front airbags is based on 4 criteria: whether a front passenger is present and his/her weight range; the position of the driver's seat; whether the front safety belts are in use; and the overall severity of the crash. These details help the systems deploy the front airbags in just the right manner, at just the right time. Just more evidence of our commitment to delivering vehicles that can truly improve your life.

**One Vehicle.
Endless Possibilities.
The All-New Ford Freestyle.**

SUV-Like Interior Room and Versatility

- Innovative Command Seating™
- Seating for up to 7
- Best-in-class passenger room
- Best-in-class rear-seat head and leg room
- Best-in-class cargo capacity
- Fit items up to 10' long inside with fold-down rear seats and class-exclusive fold-down front-passenger seat
