¹ Air bags are only a supplemental restraint system; always wear your seat belt. Even with the occupant-classification sensor, rear-facing child restraints should not be placed in the front-passenger's seat. Also, all children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts according to their size. Air bags will only inflate in certain accidents; see your owner's manual for more details. ² VDC, which should remain on when driving except when freeing the vehicle from mud or snow, cannot prevent accidents due to abrupt steering, carelessness, or dangerous driving techniques. Always drive safely. ³ The Tire Pressure Monitoring System (TPMS) measures individual tire pressure and features a display which shows this information for each tire. If one or more of the tires are under-inflated, a low tire pressure warning light will illuminate. Built into the Tire Pressure Monitoring System is a Tire Inflation Indicator. When inflating the tire and the correct air pressure is reached, the turn signals will flash and the horn will sound to alert you to stop adding air. ⁴ Availability of specific features is dependent upon the phone's Bluetooth® support.
