

SILVER SPIRIT

The reputation of the Bentley motor car was forged in the heat and drama of 1920's long distance sports car racing. In the 1930's Rolls-Royce inherited the Bentley name and brought a new motoring style to the sports car driver.

The Bentley Mulsanne is the latest statement of the Bentley philosophy. Performance, road manners, and infinite attention to detail, silence and comfort are brought together in this, the latest of a long and noble line.

Makers of the best car in the world.

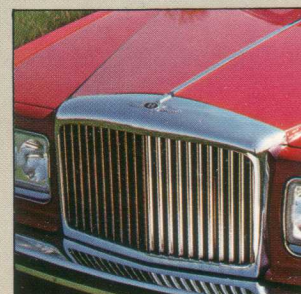

BENTLEY MULSANNE

Cars illustrated are not to US specification. All Rolls-Royce and Bentley motor cars are subject to continuous development. Your Rolls-Royce and Bentley distributor will supply the appropriate specification on request. The Rolls-Royce name and mascot, badge and radiator grille are registered trade marks as are the Bentley, mascot and badge.

ROLLS-ROYCE SILVER SPIRIT — INHERITING ALL THE TRADITIONS OF THE BEST CAR IN THE WORLD

The lustre of the Silver Spirit, incomparable in durability, is a tribute to craftsmanship, perfectionist engineering and wisely chosen materials. Exquisite burr walnut veneers for the fascia are chosen by a cultivated eye and trimmed by hand. Highest quality leather is cut, shaped, smoothed and sewn to perfection. For, in many areas there is no substitute for natural materials and the traditional skills of the craftsman — the sharpness of his eye and the sureness of his hand.

The timelessness of a Rolls-Royce motor car is a matter of record. Of all those built since 1904, over half are still giving pleasure to their owners. So it is reasonable to expect today's Silver Spirit to last for many years and the car is designed and constructed accordingly.

No Rolls-Royce motor car stems from a single blinding flash of inspiration. It emerges — over a number of years — by a process of evolution.

So it is with the Silver Spirit. From a line of distinguished predecessors it inherits much that is tried and good and true. It inherits a unique tradition of patient, individual craftsmanship, care and attention to detail.

What has emerged is a strikingly individual car — very obviously of today, yet timeless, its beauty of line springing from engineering truth rather than a stylist's pencil. A car that looks right and feels right in any surroundings, on any road in any conditions. A car that is, could only be.....a Rolls-Royce.

SILVER SPUR

As driver or passenger, the Silver Spur will enable you to travel more rapidly with more comfort and with less fatigue than you thought possible. As a symbol of prestige, there can be no more impressive introduction to your company.

The enlarged passenger compartment of Silver Spur is particularly spacious enhancing overall comfort and permitting the installation of the additional equipment you may require to conduct your business while travelling.

Special items of trim identify Silver Spur as the flagship of this new range of Rolls-Royce motor cars bringing added refinement to what is already the ultimate expression of motoring excellence.

All in all, the Silver Spur is a company workhorse of impeccable breeding. As practical, as useful, as sound a business investment as it is a continuing source of pride, pleasure and prestige.
