RS 4

Performance is an attitude

As practical as it is fast, the new Audi RS 4 Avant offers an intoxicating mix of performance, eye-catching design and everyday useability.

Shaped by its distinctive Avant side profile, the RS 4 Avant offers ample boot space and easy adventure. Its exceptional quattro all-wheel drive and RS sports suspension make it nimble and well-suited to a large range of driving surfaces.

This addictive blend of performance and pragmatism not only makes the new RS 4 Avant one of the best all-round performers money can buy, its dynamic driving experience will make any trip you take feel like the fastest possible route to your destination.

RS 4

Power, whenever and wherever you need it

Born out of the RS 4 Avant's legendary 2.9 litre V6 engine, this powerful performer is lighter, more efficient and lower in emissions. Meticulous re-engineering has raised its power output to 331 kW, allowing the RS 4 Avant to accelerate from zero to 100 km/h in a trifling 4.1 seconds.

This power flows to the quattro permanent all-wheel drive via a sporty eight-speed tiptronic gearbox, where the RS sports suspension can distribute it to the wheels with the best traction, allowing you to slice through even the most awkward of corners with crushing agility.

RS 4

Sitting has never been so moving

Equipped with the Audi virtual cockpit as standard, the new Audi RS 4 Avant's interior continues its blend of sporty performance and practical excellence. Its Fine Nappa leather RS sports seats are easy to adjust to your best driving position, while its thundering Bang & Olufsen with 3D sound-system and smartphone interface help the kilometres fly by regardless of your speed.

In addition to its spacious 505 litre boot and aluminium roof rack, the family-friendly RS 4 Avant is equipped with a vast array of safety features. Audi pre-sense, lane change assistant and a rearview camera system bring added peace of mind to this blisteringly fast ride.

RS 4

Designed to be noticed

Few cars can offer the new Audi RS 4 Avant's blend of muscular design, provocative speed and family-friendly practicality.

From the front, an aggressive bumper, large air-inlets and honeycomb grille underline the RS 4's sports DNA.

The sideview is dominated by a forward flowing, distinctly Avant bodyline and muscular wheel arches. At the rear, the twin outlets of the RS sport exhausts and an understated roof-edge spoiler add exceptional finish and detailing to this powerful all-rounder.

RS 4

Now with added mobile intelligence

The new Audi RS 4 Avant includes the full suite of Audi connect technology as part of its standard specification, giving you a host of easy-to-use navigation, infotainment and safety and security features.

Advanced safety and security

Enjoy more confidence in your safety, and the safety of the things that matter to you, with automatic emergency calls in the event of a significant accident. You'll also have Remote Access which allows you to manage your car from wherever you are.

Enhanced navigation and infotainment

Discover the best route to your destination or explore your favourite music, social media or news and weather services, without interrupting your drive.

Audi connect is not supported outside of South Africa
