

ATOS

The new Atos Prime's distinctive tall styling has already made a mark in the overseas markets. The new body of the Atos is a harmony of form and function. The "tall boy" design facilitates maximum use of headspace to create a roomier feeling for buyers in this segment. The interior has been reworked and re-engineered to offer modern and exciting features unique in its class.

INTERIOR

The dynamism and the futuristic design philosophy of the exterior continue in the interior. The seats, the legroom, and the headspace provide ample personal space for any individual and the new Atos is spacious enough to carry five adults and their luggage in comfort. Besides more space, the interior is packed with a host of smart ideas designed to make driving a pleasure.

EXTERIOR

The new Atos is more than just a small car...The Atos is a crossover vehicle combining the traditional advantages of a small car and the functionality of a multipurpose vehicle in a uniquely styled little package. The compact exterior design complements a spacious interior within. The edgy styling conveys confidence and boldness and viewed from any angle the New Atos is distinctly different looking.

The storage space in the Atos is spacious enough to carry a good amount of luggage and the ease of opening the tailgate, the large opening angle and the low boot floor height, ensures minimum exertion while loading and unloading. The new Atos also sports a sexy spoiler on the boot as part of the new look.

The New Atos can be transformed to carry a combination of passengers and luggage. Both the front seats can be reclined to create a semi flat position. The rear seat has double folding mechanisms to maximize the size of the cargo area. With the seats folded down, the new Atos offers an impressive 989 liters of cargo carrying space.

SAFETY

Hyundai Motor Company's passion for perfection shines brightest in their safety engineering. In the new Atos, safety is an integral part of the total process of car design. The ultra high strength dual impact bars, the front crumple zones and the collapsible steering column contribute to making the new Atos one of the safest cars in its segment.

The front seats feature sliding adjustment to accommodate even the tallest drivers and passengers and the reclining feature of the front seats comes in handy in breaks between long drives. The Atos also features cup holders that are extra deep to accommodate glasses and bottles of varying shapes and size and an extra deep glove box comes in handy to keep your travel essentials safe.

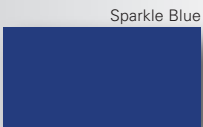

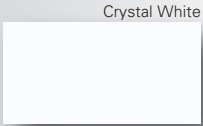

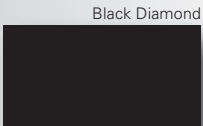

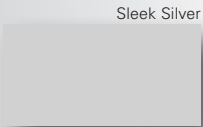

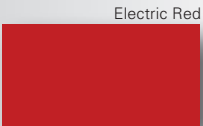

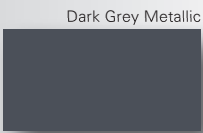

COMFORT & CONVENIENCE

To ensure maximum comfort and safety of the driver and passengers, Hyundai paid special attention to all the seats in the new Atos. It features an advanced anti-submarine safety frame seat. This design prevents sliding in case of a crash or a sudden stop. This safety frame works in conjunction with the retractable seat belts and ensures minimum knee injury in case of severe accidents.
