Advanced High-Strength Steel
Advanced Adhesives

Advanced High-Strength Steel (AHSS) and Hot-Stamped Steel

The Picanto uses more than 44% Advanced High Strength Steel (AHSS), resulting in phenomenal rigidity. Hot-stamping of components is employed in core stress areas. These measures greatly improve average body tensile strength, enhancing cabin protection and improving dynamic performance.

Braking System

The brakes are tuned to work with the ABS and tyres to reduce stopping distance, while maximising stopping power and directional control during braking.

Front Airbags

To help protect occupants and potentially reduce injuries in the event of a collision, the new Picanto offers driver and front passenger airbags.
