

Corolla

LIFE CAN ONLY GET BETTER
WITH THE NEW TOYOTA COROLLA

Corolla

A change for the better

When we set out to improve on one of life's
greats – the Toyota Corolla – we were faced
by some staunch opposition. "How can you
improve on perfection?" asked some. "Why
change a winning formula?" asked others.

But change it we did. And we believe that the
results speak for themselves.

**You're always on
course with the
new Corolla.**

The Engines

100% pure beef

Let it never be said that we
take half measures.

When it came to improving our already impressive Corolla engines, our engineers burnt the midnight oil to give you a choice of not just one, but three powerful new engines.

To kick off, there's the gutsy 1300. An engine that loves to be driven, it offers a lively performance coupled with remarkable fuel efficiency.

Next up is the powerful, 79 kW, fuel injected 1600. By combining the very best of multi-valve technology with an innovative narrow-head engine design and electronic fuel injection, we've produced a smooth, flexible engine that makes light work of heavy traffic and allows you to cruise the open road with ease.

26 1300 cm³
12-valve engine.

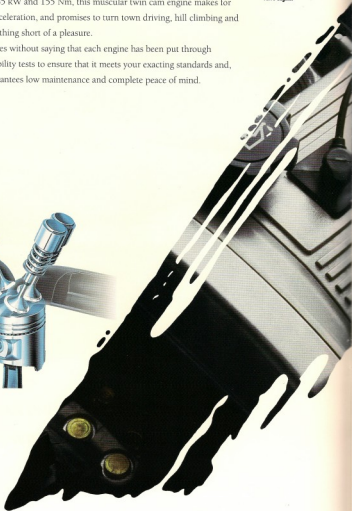

Then there's the new 1800 – an engine that pushes power and torque even further. With 85 kW and 155 Nm, this muscular twin cam engine makes for exhilarating acceleration, and promises to turn town driving, hill climbing and towing into nothing short of a pleasure.

Of course it goes without saying that each engine has been put through stringent durability tests to ensure that it meets your exacting standards and, as always, guarantees low maintenance and complete peace of mind.

Built to demanding
engineering
standards:
Toyota's new
7A-FE 1800 cm³
fuel injected, multi-
valve engine.

Toyota's legendary
multi-valve
technology in the
new 1600 and
1800 cm³ engines.

AN ENGINE THAT RESPONDS WITH
A NEW LEVEL OF SMOOTHNESS
AND REFINEMENT

Sounds of silence

Test drive a new Corolla, and you'll notice that engine noise and vibration is at a minimum. Four engine support mountings reduce vibration transmitted through the body, while a rubber coupling in the steering column limits the intrusion of tyre, gearbox and steering column vibration into the cabin.

Under acceleration or during braking, the new Corolla's anti-lift and anti-dive suspension design makes for a comfortable ride, while the Vorlauf geometry of the front suspension ensures superior roadholding.

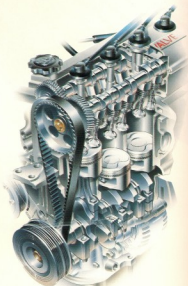

High body rigidity is achieved by attaching reinforced subframes to the body floor. This facilitates superior road holding and dramatically reduces both noise and vibration.

A cable type gear shift control and high-toothed transmission gears reduce noise even further. Scissors gears on the double overhead camshafts of the 1600 and 1800 models, as well as 8 balance weights on the crankshaft, reduce engine vibration and result in a smoother running engine.

And in the interior, asphalt sheets and sandwich type damper panels absorb noise, as do high density insulator felts on the dash panel and under the floor carpets.

Combined, these features contribute towards making Toyota Corolla one of the quietest, most technically advanced vehicles on the road today.

The overhead camshafts are driven by spring loaded scissors gears. When speed is reduced, backlash is absorbed, resulting in a smoother, quieter engine.

The new Corolla is built to withstand even the harshest conditions.

A LASTING IMPRESSION

To ensure that every Corolla that leaves our plant is as good looking tomorrow as it is today, we've taken special care with the paintwork.

Before painting a Corolla, a full dipping method is employed to degrease the body. The entire body is then dipped again in a phosphate treatment, which ensures that even the most inaccessible areas are coated and protected.

As a result of this treatment, fine crystals form on the body surface. This aids the adhesion of the E-coat – a full

dip electrodeposition that acts as a preprimer – before the rustproof primer and colour coats are applied.

Notwithstanding the fact that we use corrosion resistant steel wherever possible, we've taken every precaution to prevent rust. Wax and sealer are liberally applied to vulnerable areas like panel joints, seams and hinges, while the entire surface of the wheel housing and the whole underside of the vehicle is coated with chip resistant polyvinyl chloride.

We've even gone so far as to apply a coat of PVC and anti-chip paint to the rocker panels as protection against sand and gravel.

All things considered, when you purchase a Toyota Corolla, you can be sure that your last impression will be as good as your first.

Styling

Live life in comfort

Take a closer look at the new Corolla and you'll appreciate that we've used only the finest quality materials to offer you a unique combination of luxury and timeless style.

Ergonomically designed instrumentation and controls put you in complete control of the car and give you all the information feedback you need.

Sink back into
plush leather seats.

An easy to read
instrumentation
panel offers
information at
a glance.

A low loading sill
makes for easier
loading.

A rigid body structure
improves durability
and safety.

Your child's safety is
ensured by child
protection locks on rear
doors.

Driver and passenger safety is ensured by front and rear crumple zones, a collapsible steering column and front wheel drive roadholding. Child protection locks on rear doors add to your peace of mind. What's more, by redesigning the front bumper and headlights we've achieved a sleeker, more aerodynamic line. The hood is lower and more streamlined. And as a finishing touch, we've added Toyota's new badge – a symbol of excellence world-wide – to the front of the new grille.

Corolla 130

Neat and nimble
the new Corolla 130
delivers more
than ever before.

Fuel efficient, stylish and as reliable as ever, this Corolla also offers an automatic choke, dual exterior mirrors, cool grey interior trim, a rear window demister and a driver's left footrest as standard.

Explore wide open spaces. Take a look at the new Corolla.

Comfortable soft grip 4-spoke steering wheel.

Corolla 160i GL

Powerful and refined.

Delivering an impressive 79 kW of power and 140 Nm of torque, the Corolla 160i GL is first and foremost a car to be driven.

The powerful 1600 engine combines the very best of multi-valve technology with electronic fuel injection. Improved inlet tracts increase the swirl in the combustion chambers for more efficient fuel burning. The slick 5-speed manual ensures that added power is a breeze to control.

Performance aside, the Corolla 160i GL also caters for your creature comforts. A soft-grip 4-spoke steering wheel, quartz digital clock and tinted windscreen are standard.

While convenience is realised in the form of a remote fuel flap and boot opener, an intermittent wiper function and a folding rear seat with 60/40 split.

A slick 5-speed
gearshift puts power
at your fingertips.

Proof that the new Corolla is as good looking on the inside as it
is on the outside.

Power steering is
an available option
on the 1.60i GL.

ELECTRONIC FUEL INJECTION DOES MORE THAN "INJECT FUEL".
BY MONITORING MANY FACTORS AND ANALYSING THEM WITH A POWERFUL COMPUTER,
IT ENSURES A SMOOTH RUNNING, RESPONSIVE AND ECONOMICAL ENGINE.

INPUT

Battery
Main lights and rear window de-mister

OUTPUT

Fuel injectors
Spark plugs
Idle speed control
Fuel pump control
Air-coolant control
Instrument panel warning light

Corolla 160i GLE & 160i GLE Automatic

Guaranteed power.

Performance. And more.

Standard features include power steering.* A stereo radio/tape deck with pullout facility and 4 speakers. A dual mode airconditioner. A remote fuel flap and boot opener. Tinted windows. Plush velour upholstery. And body colour bumpers.

The power is yours
with the Corolla GLE
Automatic

Airconditioning and a pull-out
stereo radio/tape.

*For a limited period these models will also be available without power steering.

Optional alloy wheels further enhance the new Corolla's solid good looks.

To make your driving experience as pleasant as possible, we've included convenient remote boot lid and fuel flap openers.

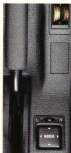

Dual mode
airconditioner and
radio/tape with
pallent facility are
standard on the
180i GLi, further
enhancing your
driving experience.

Electrically
controlled mirrors
make life easier
than ever.

For your
convenience,
central locking is
standard.

Corolla 180i GLE

For those who demand
unrestrained performance
clad in creature comforts, the
new Corolla 180i GLE
really shines.

Admire the easy-to-read sports instrumentation.

A beefy 1800 engine pumps out 85 kW of power. For effortless acceleration and pulling power, 80% of the 155 Nm of torque is on tap from only 1200 r/min. Electronic fuel injection promotes quick response and smooth running. This model features power steering,* central locking, electrically adjustable rearview mirrors, sports instrumentation, a height adjustable driver's seat and tilt adjustable steering. A dual mode airconditioner, a radio/tape with pullout facility, a remote control immobiliser/alarm, velour trim and body colour bumpers come as standard.

*For a limited period this model will also be available without power steering.

Corolla 180i GSE & GSE Automatic

A synthesis of performance, luxury and reliability.

In addition to impressive power and special features such as electrically adjustable rearview mirrors, a height adjustable driver's seat and sports instrumentation, the Corolla 180i GSE and GSE Auto both offer power steering as standard. A remote controlled alarm/immobiliser and central locking system. A dual mode airconditioner. Sporty seats. A convenient 'headlamp on' warning buzzer. And a stereo radio/tape.

Added to this, the dashing Corolla 180i GSE features alloy wheels and a body colour rear spoiler, while the GSE Auto features electrically operated windows.

On the 180i GSE Auto electrically operated windows and central locking are standard.

Enjoy the convenience and peace of mind of remote control locking and an alarm/immobiliser.

Out of sight but never out of reach.

Even our power steering tilts in your favour.

180i GSE manual with standard 14" alloy wheels.

Corolla 180i GSX

The flagship of the Corolla range.

The new Corolla 180i GSX offers a unique balance of sheer luxury, impressive performance and timeless style.

A careful inspection will reveal that nothing has been spared in creating a car of this calibre. Time spent fine tuning its high-torque 1800 engine and honing its sleek lines, is matched only by the attention lavished on the luxurious interior.

Sink back into designer seats with supple leather trim and enjoy crystal clear quality sound from a 6 disc boot mounted CD player or premium grade radio/tape with RDS. For superior comfort, we've included a push button airconditioner with automatic climate control. For added convenience, a 12-way adjustable driver's seat, electric windows and a full length console with dual lidded storage boxes are standard. And when it comes to downright driving pleasure, the Corolla 180i GSX delivers power steering, an uprated suspension and disc brakes on all four wheels.

Satisfy your senses with a premium radio/tape and push button ventilation system with automatic climate control.

Boot mounted
6 disc CD player.

Electric windows
and central locking
offer added
convenience.

Disc brakes on all
four wheels ensure
failproof braking
every time.

Designer seats
with plush
leather trim.

Welcome to our world

When you buy a Corolla you get a great deal more than a reliable car. You also receive the Toyota commitment to service and product excellence. From every production line worker and every dealer, all the way up to senior management. It is a commitment to doing things right. The first time. Every time.

You also receive the right back-up. At more than 300 dealers in Southern Africa and whilst you're travelling, roadside assistance is only a phone call away on 0800-022600 (toll free) 24 hours a day, seven days a week. It's our way of assuring your peace of mind. The kind that only comes with complete satisfaction.

Because when you buy a Toyota, everything keeps going right.

Everything keeps going right
