# TOYOTA ENVIRONMENTAL CHALLENGE 2050

At Toyota, creating technologically advanced vehicles isn't our only priority; we're committed to lowering our environmental impact throughout our entire production process. How? By setting ourselves six challenges that will see us reach a truly world-changing goal: a positive environmental impact by 2050.

The message is clear – Toyota Motor Corporation (TMC) wholeheartedly supports the Paris Agreement and accepts the challenge to achieve carbon neutrality by 2050. The Paris Agreement is a legally-binding international treaty on climate change and is aimed at reducing the emission of gases that contribute to global warming. While this treaty was only adopted in 2015, Toyota has been innovating and investing in technology to reduce emissions and achieve carbon neutrality for well over 30 years. Toyota has also led the way with more electrified vehicles on the road than any other automaker.

## CHALLENGE 1

### NEW VEHICLE ZERO CO<sub>2</sub> EMISSIONS CHALLENGE

By owning a Toyota you would be contributing to the reduction of vehicle CO<sub>2</sub> emissions by 90% in 2050 as opposed to 2010. You will help us promote the development of next-generation vehicles and further accelerate the spread of these vehicles.

## CHALLENGE 2

### LIFE CYCLE ZERO CO<sub>2</sub> EMISSIONS CHALLENGE

You are lending a helping hand to Toyota's efforts to reduce to zero not only CO<sub>2</sub> emissions produced in travelling and manufacturing, but all CO<sub>2</sub> emissions including the process of materials production, disposal and recycling of vehicles.

## CHALLENGE 3

### PLANT ZERO CO<sub>2</sub> EMISSIONS CHALLENGE

You uphold the two main pillars of our strategy to achieve zero CO<sub>2</sub> emissions at our plants which are:

1. Developing and introducing low-CO<sub>2</sub> technologies with ongoing kaizen.
2. Adopting renewable energy sources and utilising hydrogen energy.

## CHALLENGE 4

### CHALLENGE OF MINIMISING AND OPTIMISING WATER USAGE

In automobile manufacturing, we use water in painting, forging and other processes. Therefore, even a small reduction of its impact on the water environments is important. We have two measures to achieve this, comprehensive reduction of the amount of water used and comprehensive purification of the water and returning it to the earth.

## CHALLENGE 5

### CHALLENGE OF ESTABLISHING A RECYCLING-BASED SOCIETY AND SYSTEMS

You have contributed to our 40 years on the challenge of resource recycling. Going forward, by rolling out to the world the technology and systems evolved in Japan, we will all continue working on the challenge of establishing a recycling-based society.

## CHALLENGE 6

### CHALLENGE OF ESTABLISHING A FUTURE SOCIETY IN HARMONY WITH NATURE

Here at Toyota we have engaged in planting trees at our plants and environmental conservation activities in our surrounding areas. To establish a society where humans and nature coexist in harmony, we are promoting several activities to connect regions, the world and the future.

THE TOYOTA COROLLA HATCH HAS BEEN MANUFACTURED TO MINIMISE ITS CARBON FOOTPRINT.

Guided by the goals of the Toyota Environmental Challenge 2050, as little impact as possible is made on the environment during each step of the process. From design to manufacturing, to end-of-life recycling programmes, our planet always comes first. This is because the ultimate long-term goal for Toyota is to make all our vehicles as environmentally friendly as possible. With this in mind, the entire Corolla Hatch range has been designed to have very low CO<sub>2</sub> emissions.

TOYOTA IS SERIOUS ABOUT COMBATING THE PROBLEMS ASSOCIATED WITH WASTE TYRES IN THE COUNTRY AND HAS THEREFORE TAKEN UP ITS PRODUCER RESPONSIBILITY AS DEFINED BY THE WASTE MANAGEMENT ACT OF 2008. WASTE TYRE REGISTRATION NUMBER: TPREG0031GAU
