ANTI-LOCK BRAKING SYSTEM (ABS)

All Etios Sprint models come with an Anti-lock Braking System (ABS) that stops the vehicle's wheels from locking should you brake suddenly. ABS is especially useful when braking on a slippery road.

**SO SIT BACK, RELAX
AND ENJOY THE DRIVE,
WORRY FREE.**

THE ETIOS RANGE IS LOADED WITH FEATURES TO KEEP YOU AND YOUR FAMILY SAFE.

Each Sprint comes equipped with Electronic Brake-force Distribution (EBD), which evenly distributes braking power to give you excellent control when braking hard. For extra peace of mind and safety when it matters most, driver and front passenger airbags come standard on all models and child protection locks on the back doors keep the pups safely inside too. Finally, the whole range comes standard with remote control central locking and an immobiliser for extra convenience and assurance when you're not around.

SUSTAINABILITY

The Etios range has been manufactured to minimise its carbon footprint. With this in mind, the entire Etios range has been designed to have very low CO₂ emissions.

At Toyota, creating technologically advanced vehicles isn't our only priority; we're committed to lowering our environmental impact throughout our entire production process. How? By setting ourselves six challenges that will see us reach a truly world-changing goal: a positive environmental impact by 2050.

CHALLENGE 1

NEW VEHICLE ZERO CO₂ EMISSIONS CHALLENGE

By owning a Toyota, you will be contributing to our challenge to reduce vehicle CO₂ emissions by 90% in comparison to 2010 levels, by 2050. You will help us promote the development of next-generation vehicles and further accelerate the spread of these vehicles.

CHALLENGE 3

PLANT ZERO CO₂ EMISSIONS CHALLENGE

Our strategies to achieve zero CO₂ emissions at our plants are:

- 1) Developing and introducing low-CO₂ technologies with ongoing "Kaizen".
- 2) Adopting renewable energy sources and utilising hydrogen energy.

CHALLENGE 5

CHALLENGE OF ESTABLISHING A RECYCLING-BASED SOCIETY AND SYSTEM

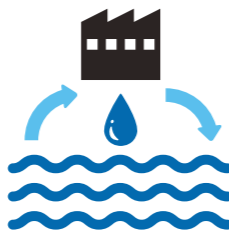

We have been working for 40 years on our resource recycling challenge. We will continue working on the challenge of establishing a recycling-based society by rolling out the technology and systems evolved in Japan, to the world.

CHALLENGE 2

LIFE CYCLE ZERO CO₂ EMISSIONS CHALLENGE

Your purchase is lending a helping hand to Toyota's efforts to reduce to zero, not only CO₂ emissions produced in travelling and manufacturing, but all CO₂ emissions included in the process of materials production, disposal and recycling of vehicles.

CHALLENGE 4

CHALLENGE OF MINIMISING AND OPTIMISING WATER USAGE

In automobile manufacturing, we use water in painting, forging and other processes. Therefore, even a small reduction of its impact on the water environment is important. We have two measures to achieve this. These are the comprehensive reduction of the amount of water used, and comprehensive water purification and returning it to the earth.

CHALLENGE 6

CHALLENGE OF ESTABLISHING A FUTURE SOCIETY IN HARMONY WITH NATURE

At Toyota, we have engaged in planting trees at our plants and environmental conservation activities in our surrounding areas. We are also promoting several activities across regions and the world to establish a society where humans and nature coexist in harmony.
