# LIKE NOBODY'S BUSINESS

IF IT'S FROM ALL OVER AND BACK AGAIN OR FROM ANYWHERE TO BEYOND THAT THE QUANTUM  
WILL GET YOU AND YOUR BUSINESS FROM A TO B AND EVERYWHERE IN BETWEEN.

Whichever the choice you make, whether it's the standard Panel Van with the super long wheelbase, wide body and high roof or the brand new crew cab model, "accommodation" is the key word. With its load capacity, durability, reliability and economic design, the Quantum is here to take care of business.

We've introduced two new Panel Van Crew Cab models: the 2.5 SLWB Diesel model and the 2.7 SLWB Petrol model. Both sport 6 seats that are introduced to create synergy between seating and load space - multi-tasking at its finest.

All models feature a low floor and large rear door opening, for easy loading of even the bulkiest cargo. The super LWB models offer dual sliding doors large enough to accommodate a forklift and a standard pallet.

Thanks to a cab-forward design, the Quantum boasts a longer load area: a 6m<sup>3</sup> load bay for the standard Panel Van and an impressive 9,8m<sup>3</sup> for the super LWB model. The Quantum has a minimum towing capacity of 1000 kg and a maximum of 1400 kg and to drive it, only a Code B driver's licence is required.

We've given the Quantum a few new perks to handle your jobs. A brand new audio system\*, redesigned heat panel and outside temperature display are here to complement any task at hand. A redesigned front bumper, headlamps, rear combination lamps, radiator grille as well as added daytime running lights will keep your Quantum on point for the foreseeable journey ahead.

The Quantum is built around its passengers and safety is essential. With features such as an ingenious double-wishbone front impact absorbing structure, front door impact beams and breakaway dash, as well as a retractable steering column and brake pedal. Both Panel Vans feature driver airbags and ABS with emergency brake assist.

### TRANSMISSION AND SUSPENSION

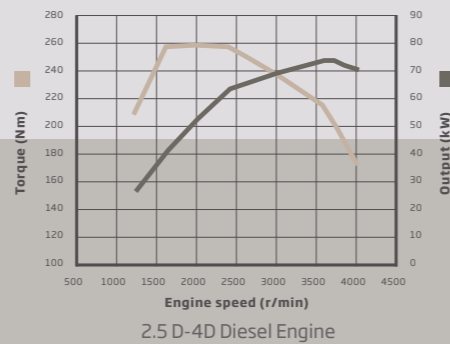

The business end of the Quantum's design shows in its transmission and suspension. Its manual transmission is tuned to provide optimum shifting ease and is built to be durable. Its suspension consists of a double-wishbone torsion bar spring suspension and rear leaf spring suspension designed to optimise straight-line-stability, ride comfort and versatile load-carrying capacity because it creates more space in the rear of the vehicle.

Toyota's VVT-i (Variable Valve Timing-intelligent) engine technology combines outstanding drivability with low fuel consumption and reduced emissions. Add to that a standard 5-year/90 000 km ToyotaCare Service Plan as well as 10 000 km service intervals and you've got the peace of mind that low operating costs bring.

Common rail technology allows for the precise measurement and injection timing of fuel. The result? More power, better fuel consumption, less noise and less pollution. Operating costs are further reduced thanks to the standard 5-year/90 000 km ToyotaCare Service Plan and 10 000 km service intervals.

### SAFETY FIRST

The double-wishbone front frame allows the driver and passenger to be seated further up front (allowing more space in the rear) without jeopardising safety. In the event of a collision, front seat passengers are also protected by a breakaway dash and side impact protection beams.

# DOWN TO THE BRASS TACKS

IN THE DRIVER'S SEAT YOU'LL FIND THAT THE QUANTUM REALLY TAKES A STEP FORWARD IN MORE WAYS THAN JUST ITS DESIGN.

ACROSS THE RANGE, OUR POWERFUL, ECONOMICAL ENGINES MAKE FOR COST-EFFECTIVE TRANSPORTATION AND OUR SAFETY FEATURES OFFER ASSURED PEACE OF MIND.

#### THE ANTI-LOCK BRAKING SYSTEM

ABS prevents wheels from locking up during emergency braking and provides vehicle stability and increased steering response, allowing the driver more control when swerving to avoid obstacles.

#### SAFETY AND SECURITY FEATURES

When you're moving from A to B, safety in the Quantum is our priority. Added to airbags and ABS that help keep control of the vehicle on slippery roads, is a Brake Pedal and Steering Shaft Intrusion - Reduction System with Rotary Mechanism, which helps prevent the brake pedal and steering shaft from injuring the driver in the event of a front and rear collision. The front and sides are protected by upper and lower crumple zones positioned at the front of the frame, as well as side impact beams in the front doors.

Contributing to the Quantum's class-leading safety are well-thought out features such as an anti-glare rear-view mirror that ensures constant driver visibility by protecting the driver's eyes from the glare of vehicle lights; and a high-mounted stop lamp which indicates the slowing down or stopping of the vehicle to rear drivers. Add to this an immobiliser, central locking and the ToyotaCare Microdot System and you and your business are safe and secure.

#### AIRBAGS

The Panel Van comes with a driver airbag while the Bus is equipped with driver and front passenger airbags.

(Actual airbags may differ from illustration.)

#### GOING GREENER

Toyota's vision of Sustainable Mobility is ingrained and honoured at all levels. The introduction of a company-wide Environmental Management System (EMS) ensures this. EMS guarantees constant progress at Toyota worldwide, as it not only allows such efforts as measuring the environmental impact of our vehicles over entire lifecycles, but has also driven the radical reduction of the environmental impact at our manufacturing plant, and along our entire supply chain.

Any current negative impact is being addressed through the comprehensive Toyota Environmental Action Plan, known as ECO-Project. This encompasses all areas of Toyota's operations from the design of new vehicles and manufacturing processes, to the use of materials and end-of-life recycling programmes.

You may read more about these projects and the Toyota Earth Charter at [www.toyota.co.za](http://www.toyota.co.za) to find out how Toyota is working towards its eventual goal of zero emissions in all its activities and products.

Thanks to a philosophy of continuous improvement and the quest for low emissions, Toyota's new generation engines are cleaner burning than ever before with dramatically reduced exhaust emissions. You can rest assured that no matter what colour Quantum you choose to drive home, it's several shades greener than most vehicles on the road today.

Toyota is serious about combating the problems associated with waste tyres in the country and has, therefore, taken up its producer responsibility as defined by the new Waste Management Act of 2008. Waste TyreReg No. TPREG0031GAU
